GENERAL

Toteline® 7-day, programmable thermostats are wall-mounted, low-voltage thermostats which maintain room temperature by controlling the operation of an HVAC (heating, ventilation, and air-conditioning) system. Separate heating and cooling set points and auto-changeover capability allow occupied and unoccupied programming for energy savings.

All programmable thermostats allow up to 4 time/temperature settings to be programmed per 24-hr period. Each thermostat stores programs for 7 independent days. Batteries are not required. During power interruption, the internal memory stores current schedules for an unlimited time while the clock continues to run for at least 72 hours.

INSTALLATION CONSIDERATIONS

Outdoor Temperature Sensing — All programmable thermostats can be equipped with an optional outdoor temperature sensor, part no. TSTAE0XSEN04-05. If this option is to be installed, place thermostat installation so that 2 wires can be run from the thermostat to an outdoor location.
