Toward A Minor Architecture:

Toward A Minor Architecture Jill Stoner, 2012-03-09 A major proposal for a minor architecture and for the making of spaces out of the already built Architecture can no longer limit itself to the art of making buildings it must also invent the politics of taking them apart This is Jill Stoner's premise for a minor architecture Her architect's eye tracks differently from most drawn not to the lauded and iconic but to what she calls the landscape of our constructed mistakes metropolitan hinterlands rife with failed and foreclosed developments undersubscribed office parks chain hotels and abandoned malls These graveyards of capital Stoner asserts may be stripped of their excess and become sites of strategic spatial operations But first we must dissect and dismantle prevalent architectural mythologies that brought them into being western obsessions with interiority with the autonomy of the building object with the architect's mantle of celebrity and with the idea of nature as that which is other than the built metropolis These four myths form the warp of the book Drawing on the literary theory of Gilles Deleuze and Félix Guattari Stoner suggests that minor architectures like minor literatures emerge from the bottoms of power structures and within the language of those structures Yet they too are the result of powerful and instrumental forces Provoked by collective desires directed by the instability of time and celebrating contingency minor architectures may be mobilized within buildings that are oversaturated underutilized or perceived as obsolete Stoner's provocative challenge to current discourse veers away from design through a diverse landscape of cultural theory contemporary fiction and environmental ethics Hers is an optimistic and inclusive approach to a more politicized practice of architecture

What Is a Minor Architecture?, digital original edition Jill Stoner, 2014-01-10 Jill Stoner's architect's eye tracks differently from most drawn not to the lauded and iconic but to what she calls the landscape of our constructed mistakes metropolitan hinterlands rife with failed and foreclosed developments undersubscribed office parks chain hotels and abandoned malls In this BIT Stoner introduces the idea of minor architectures that emerge from the bottoms of power structures and within the language of those structures

Unplanned Visitors Olivier Vallerand, 2022-03-30 Sexuality and gender have long been influential in understanding the construction of domestic space its meanings often revealing a binary division of private and public female and male By reconstructing the foundation of queer critiques of space and by analyzing the representation of domesticity in contemporary art and architecture Unplanned Visitors shows the blurring of private and public that can occur in any domestic space and explores the potential of queer theory for understanding and designing the built environment Olivier Vallerand investigates how queer critiques building on pioneering feminist work question the relation between identity and architecture and highlight normative constructs

underlying domestic spaces He draws out a genealogy of queer space in theoretical discourse in architecture studying projects by Mark Robbins Joel Sanders J Mayer H Elmgreen Dragset Andr s Jaque and MYCKET among others These works blur the traditional borders between architecture and art to emphasize the tensions between private and public and their impact on assumptions about domestic space and family structure The challenges in moving from experimental installations to built environments suggest how designers must acknowledge and respond to the social contexts that shape architecture rethinking how domestic spaces can be designed to allow everyone to better manage the expression of their self identification through their living environments Unplanned Visitors poses a challenge to traditional architectural theory and history but also suggests a renewed and more inclusive ethics whereby designers explicitly address social and political power structures The potential of a queer approach to architectural design history theory and education is precisely to enact a method that creates more inclusive buildings and safer neighbourhoods for everyone
