

A woman with blonde hair, wearing a light-colored corset, is lying down. A man in a white lab coat and a blue stethoscope around his neck is leaning over her, examining her. The scene is dimly lit, with a focus on the woman's torso and the doctor's hands.

 This is Volume five of a series that looks at the developmental stages in addressing the complex and social problem of child
 abuse The articles in this volume address the treatment of child victims and adult survivors of childhood sexual physical and
 emotional abuse and neglect Where physical abuse is concerned treatment of victims and survivors lagged far behind the
 treatment of sexual abuse victims and survivors This may be due in part to the fact that in cases of physical abuse with its
 physical manifestations that heal more attention is paid to the immediate physical safety of children than to their short and
 long term emotional needs Thereafter the focus of treatment tended to be on parents in hopes of preventing further abuse
