

Apart from receiving electronic fuel injection in 2008 and electronic instruments and restyled front discs in 2010, changes to the Speedmaster were not outwardly obvious. In 2011, however, the deletion of the metal shrouds fitted to the front forks of earlier Speedmasters, a single front disc brake, new design wheels and a host of detail styling refinements gave the Speedmaster a fresh new look.

Thruxton

The Thruxton was launched in November 2003 for the 2004 model year, and was the first machine to be equipped with the new 655 cc version of the parallel twin engine.

The new engine featured a traditional 360° crankshaft and was tuned to a higher level than those used later in the other machines in

Triumph's line-up, establishing the Thruxton as the 'sports' bike of the range.

The Thruxton had drop handlebars and adjustable spring pre-load for the front suspension, with a steeper steering angle for more agile handling and longer rear shock absorbers.

In addition to electronic fuel injection, a number of other changes were made to the Thruxton in 2008; the original clip-on drop handlebars were replaced by a one-piece handlebar, an integral front brake master cylinder and fluid reservoir replaced the separate items of earlier models, and handlebar end mirrors were fitted. In 2010 electronic instruments were fitted and a special edition model with flyscreen, special paint finish and black-painted engine casings was available.

Scrambler

The Scrambler was launched in 2006, styled after the dual-purpose street scramblers that were produced in the 1960s for the American market.

The engine was the same 655 cc unit fitted to the America and Speedmaster, with a 270° crankshaft and mild state of tune. However, in keeping with the off-road theme, steering geometry was altered and ground clearance raised.

The Scrambler was equipped with dual-purpose tyres and high level exhaust pipes as standard, with solo seat and luggage rack, headlight grille, handlebar brace and sump guard available from a range of accessories.

Changes to the Scrambler have been few. It was fitted with electronic fuel injection from 2008 and electronic instruments from 2010.

Identification numbers

Frame and engine numbers

The frame serial number is stamped into the right-hand side of the steering head. The engine number is stamped into the top of the crankcase on the right-hand side. Both of these numbers should be recorded and kept in a safe place so they can be furnished to law enforcement officials in the event of a theft.

The frame and engine serial numbers should also be kept in a handy place (such as with

your driver's licence) so they are always available when purchasing or ordering parts for your machine.

Buying spare parts

Once you have found the identification numbers, record them for reference when buying parts. Since the manufacturers change specifications, parts and vendors (companies that manufacture various components on the machine), providing the ID numbers is the only

way to be reasonably sure that you are buying the correct parts.

Whenever possible, take the worn part to the dealer so direct comparison with the new component can be made. Along the trail from the manufacturer to the parts shelf, there are numerous places that the part can end up with the wrong number or be listed incorrectly.

The two places to purchase new parts for your motorcycle – the franchised or main dealer and the parts/accessories store – differ in the type of parts they carry. While dealers can obtain every single genuine part for your motorcycle, the accessory store is usually limited to normal high wear items such as chains and sprockets, brake pads, spark plugs and cables, and to tune-up parts and various engine gaskets, etc.

Used parts can be obtained from a breaker for roughly half the price of new ones, but you can't always be sure of what you're getting. Once again, take your worn part to the breaker for direct comparison, or when ordering by mail order make sure that you can return it if you are not happy.

Whether buying new or used parts, the best course is to deal directly with someone who specialises in your particular make.

The engine number is stamped into the top of the crankcase on the right-hand side of the engine

The frame number is stamped into the right-hand side of the steering head

The VIN plate (arrowed) is riveted to the frame behind the steering head on the left-hand side
