Architecture and Design at the Museum of Modern Art Thomas S. Hines, 2019-01-22 A comprehensive and fascinating look at the history of the Museum of Modern Art's Architecture and Design Department under the leadership of the influential curator Arthur Drexler Arthur Drexler 1921 1987 served as the curator and director of the Architecture and Design Department at the Museum of Modern Art MOMA from 1951 until 1986 the longest curatorship in the museum's history Over four decades he conceived and oversaw trailblazing exhibitions that not only reflected but also anticipated major stylistic developments Although several books cover the roles of MoMA's founding director Alfred Barr and the department's first curator Philip Johnson this is the only in depth study of Drexler who gave the department its overall shape and direction During Drexler's tenure MoMA played a pivotal role in examining the work and confirming the reputations of twentieth century architects among them Frank Lloyd Wright Le Corbusier Richard Neutra Marcel Breuer and Ludwig Mies van der Rohe Exploring unexpected subjects from the design of automobiles and industrial objects to a reconstruction of a Japanese house and garden Drexler's boundary pushing shows promoted new ideas about architecture and design as modern arts in contemporary society The department's public and educational programs projected a culture of popular accessibility offsetting MoMA's reputation as an elitist institution Drawing on rigorous archival research as well as author Thomas S Hines's firsthand experience working with Drexler *Architecture and Design at the Museum of Modern Art* analyzes how MoMA became a touchstone for the practice and study of midcentury architecture *Swatt | Miers* The Images Publishing Group, Swatt | Miers Architects, 2017-03-01 This new monograph of the work of Bay Area based internationally acclaimed Swatt Miers Architects features 30 exciting new projects including 20 new homes covering the prolific decade between 2006 and 2016 This 10 year period has seen the work of Swatt Miers expand into different regions of California including the Central Valley the Northern California wine country and Los Angeles different states including Hawaii and Colorado and other regions of the world including Canada India and Spain Designed from the inside out the constant threads that pervade the work include strong relationships of architecture to land open planning for informal living and dissolving the boundary between inside and outside all designed to be as beautiful to live in as to behold This volume showcases this firm's award winning projects and recent accomplishments in glorious full color and is replete with insightful and engaging commentary across the monograph's extraordinary collection of international works *California Design, 1930-1965 Living In a Modern Way* Wendy Kaplan, 2011 The first comprehensive examination of California's mid century modern design generously illustrated In 1951 designer Greta Magnusson Grossman observed that California design was not a superimposed style but an answer to present conditions It has developed out of our own preferences for living in a modern way California design influenced the material culture of the entire country in everything from architecture to fashion This generously illustrated

book which accompanies a major exhibition at the Los Angeles County Museum of Art is the first comprehensive examination of California's mid-century modern design. It begins by tracing the origins of a distinctively California modernism in the 1930s by such European migrants as Richard Neutra, Rudolph Schindler and Kem Weber; it finds other specific design influences and innovations in solid color commercial ceramics, inspirations from Mexico and Asia, new schools for design training, new concepts about leisure and the conversion of wartime technologies to peacetime use exemplified by Charles and Ray Eames's plywood and fiberglass furniture. The heart of California Design is the modern California home famously characterized by open plans conducive to outdoor living. The layouts of modernist homes by Pierre Koenig, Craig Ellwood and Raphael Soriano, for example, were intended to blur the distinction between indoors and out. Homes were furnished with products from Heath Ceramics, Van Keppel Green and Architectural Pottery, as well as other previously unheralded companies and designers. Many objects were designed to be multifunctional: pool and patio furniture that was equally suitable indoors; lighting that was both task and ambient; bookshelves that served as room dividers; and bathing suits that would turn into ensembles appropriate for indoor entertainment. California Design includes 350 images, most in color, of furniture, ceramics, metalwork, architecture, graphic and industrial design, film, textiles and fashion, and ten incisive essays that trace the rise of the California design aesthetic of wartime technologies to peacetime use exemplified by Charles and Ray Eames's plywood and fiberglass furniture.
