Theology And The Problem Of Evil Signposts In Theology:

Theology and the Problem of Evil Kenneth Surin, 1986 **God's Wounds: Hermeneutic of the Christian Symbol of Divine Suffering, Volume Two** Jeff B. Pool, 2010-01-01 This book constitutes the second volume of a three volume study of Christian testimonies to divine suffering God's Wounds Hermeneutic of the Christian Symbol of Divine Suffering vol 2 Evil and Divine Suffering The larger study focuses its inquiry into the testimonies to divine suffering themselves seeking to allow the voices that attest to divine suffering to speak freely then to discover and elucidate the internal logic or rationality of this family of testimonies rather than defending these attestations against the dominant claims of classical Christian theism that have historically sought to eliminate such language altogether from Christian discourse about the nature and life of God This second volume of studies proceeds on the basis of the presuppositions of this symbol those implicit attestations that provide the conditions of possibility for divine suffering that which constitutes divine vulnerability with respect to creation as identified and examined in the first volume of this project an understanding of God through the primary metaphor of love God is love and an understanding of the human as created in the image of God with a life though finite analogous to the divine life the imago Dei as love The second volume then investigates the first two divine wounds or modes of divine suffering to which the larger family of testimonies to divine suffering normally attest 1 divine grief suffering because of betrayal by the beloved human or human sin and 2 divine self sacrifice suffering for the beloved human in its bondage to sin or misery to establish the possibility of redemption and reconciliation Each divine wound thus constitutes a response to a creaturely occasion The suffering in each divine wound also occurs in two stages a passive stage and an active stage In divine grief God suffers because of human sin betrayal of the divine lover by the beloved human divine sorrow as the passive stage of divine grief and divine anguish as the active stage of divine grief In divine self sacrifice God suffers in response to the misery or bondage of the beloved human's infidelity divine travail focused on the divine incarnation in Jesus of Nazareth as the active stage of divine self sacrifice and divine agony focused on divine suffering in the crucifixion of Jesus of Nazareth as the passive stage of divine self sacrifice **The Theodicy of Peter Taylor Forsyth** Theng Huat Leow, 2011-11-08 The theodicy of the remarkable Scottish Congregationalist theologian Peter Taylor Forsyth has long been recognized as a vital and significant contribution to twentieth century theology Up until now however there has not been a substantial full length treatment of Forsyth's work on the problem of evil The Theodicy of Peter Taylor Forsyth fills this lacuna by setting out in a fairly systematic and comprehensive manner Forsyth's justification of God in the face of evil In so doing it also illuminates several other related areas of his thought such as his epistemology and Christology as well as his understanding of sin the atonement providence divine passibility human origins and the God world relationship Bringing Forsyth's approach to the subject into conversation with other prominent thinkers like Leibniz Dostoyevsky Camus Moltmann Hick Bauckham and Fiddes this book also suggests ways in which Forsyth's justification of God contributes to the current state of Christian theodicy It highlights

Forsyth's ability to integrate insights from different approaches even those that have hitherto generally been considered diametrically opposed notions Forsyth's theodicy therefore presents an integrative approach to the topic with every theme flowing from and returning to a clear center the cross of Christ As the book also makes clear Forsyth considers theodicy to be an immensely practical discipline with significant implications for human life In every sense therefore it constitutes a crucial justification of the ways of God to humanity

God's Wounds: Hermeneutic of the Christian Symbol of Divine Suffering, Volume One Jeff B. Pool, 2009-01-01 This book constitutes the first volume of a three volume study of Christian testimonies to divine suffering God's Wounds Hermeneutic of the Christian Symbol of Divine Suffering Divine Vulnerability and Creation This study first develops an approach to interpreting the contested claims about the suffering of God Thus the larger study focuses its inquiry into the testimonies to divine suffering themselves seeking to allow the voices that attest to divine suffering to speak freely to discover and elucidate the internal logic or rationality of this family of testimonies rather than defending these attestations against the dominant claims of classical Christian theism that have historically sought to eliminate such language altogether from Christian discourse about the nature and life of God Through this approach this volume of studies into the Christian symbol of divine suffering then investigates the two major presuppositions that the larger family of testimonies to divine suffering normally hold an understanding of God through the primary metaphor of love God is love and an understanding of the human as created in the image of God with a life though finite analogous to the divine life the imago Dei as love When fully elaborated these presuppositions reveal the conditions of possibility for divine suffering and divine vulnerability with respect to creation

Approaches to the Study of Religion Peter Connolly, 2001-11-30 It has been argued that religious studies is a polymethodic discipline and that the student of religion should be familiar with the approaches of the major disciplines concerned with understanding the nature of religion not least because the approach adopted has profound influence on the phenomena chosen for investigation and the conclusions reached This book is the first textbook specifically designed for undergraduate students that provides the essential background on methods of the major relevant disciplines Presenting each of the significant approaches to religion in an informed manner the book brings together experienced researchers from feminism anthropology sociology phenomenology psychology philosophy and theology It presents a consistent approach throughout with each chapter dealing with the same themes the historical development of the approach the characteristics of the approach and the surrounding issues and debates

Boyd,2025-08-04 Where does evil come from If there is a sovereign creator God as Christian faith holds is this God ultimately responsible for evil Does God s sovereignty mean that God causes each instance of sin and suffering How do Satan his demons and hell fit into God s providential oversight of all creation and history How does God interact with human intention and action If people act freely does God know in particular every human decision before the choice is made In this important book Gregory A Boyd mounts a thorough response to these ages old questions which remain both crucial and contentious both practical and complex In this work Boyd defends his scripturally grounded trinitarian warfare theodicy presented in *God at War* with rigorous philosophical reflection and insights from human experience and scientific discovery Critiquing the classical Calvinist solution to the problem of evil he advocates an alternative understanding of the sovereignty of the trinitarian God and of the reality of Satan that sheds light on our fallen human condition While all may not agree with Boyd s conclusions *Satan and the Problem of Evil* promises to advance the church s discussion of these critical issues Journal of Bible and Religion ,1962 Includes section Book reviews **Religion as Critique** Robert John Ackermann,1985 While science renews itself by refuting and replacing pictures of how the world is religion derives its longevity from the ability to create images of how the world ought to be In this view religions arise as legitimate protests against prevailing ways of life that is as forms of critique Robert Ackermann here explores this idea considering the manner in which six major religion systems Christianity Judaism Islam Marxism Hinduism and Buddhism articulate critique This approach differs markedly from most contemporary philosophy of religion which the author believes has grown sterile by seeing its task as the logical analysis of religions viewed as collections of dogmata He proposes instead that one see the major religions as both dead and alive dead in their orthodoxy but alive in providing a source of critical ideas for evaluating surrounding society After indicating the latent possibilities for social critique in such issues as environmental concerns war and the status of women Ackermann turns to the history of Christianity in the United States He utilizes the grid group analysis of Mary Douglas and ideas from Thomas Luckmann Robert Bellah and John Cuddihy to trace Christianity s evolution from confrontation to quiet accommodation Ackermann demonstrates that currently privatized versions of Christianity have lost out to a largely unnoticed civil religion whose critical resources are too impoverished to provide more than short term social steering In this situation Christianity s critical potential is unlikely to be noticed particularly by those who turn to other religious traditions for critical perspectives on contemporary society
