Generations Judith Burnett, 2016-04-15 Generations The Time Machine in Theory and Practice challenges the fragmented and diverse use of the concept of generation commonly found in the social sciences It approaches the concept in a manner that stretches the sociological imagination away from its orientation toward the present by building the concept of the passage of time into our understanding of the social It proposes an innovative and exciting view of the field of generations lifting it out from life course and cohort analysis and reconstituting the area with fresh and dynamic ways of seeing With its unique intellectually innovative and sustained critical study of generational work Generations will appeal to scholars across a range of social sciences and humanities and will be of particular interest to social theorists and anthropologists as well as sociologists of social history consumption identity and culture

Connecting Generations Hayim Herring, 2019-05-08 Social isolation loneliness and suicide are conditions we often associate with the elderly But in reality these issues have sharply increased across younger generations Baby Boomers Gen X ers Millennials and post Millennials all report a declining number of friends and an increasing number of health issues associated with loneliness Even more concerning it appears that the younger the generation the greater the feelings of disconnection Regardless of age it feels as though we re living through a period of ongoing disequilibrium because we re not able to adapt quickly enough to the social and technological changes swirling around us These powerful changes have not only isolated individuals from their own peers but have contributed to becoming an age segregated society And yet we need fulfilling relationships with people our own age and across the generations to lead lives that are rich in meaning and purpose Even in those rare communities where young and old live near each other they lack organic settings that encourage intergenerational relationships In addition it isn t technology but generational diversity that is our best tool for navigating the changes that affect so many aspects of our lives whether it s work entertainment education or family dynamics We can t restore yesterday s model of community where only those who were older transmitted wisdom downward to the generation below But we can relearn how much members of different generations have to offer each other and recreate intergenerational communities for the 21st century where young old and everyone in between is equally valued for their perspectives and where each generation views itself as having a stake in the other s success Here Hayim Herring focuses more deeply on how Baby Boomers Gen Xers and Millennials perceive one another and looks underneath the generational labels that compound isolation He offers ways we can prepare current and future generations for a world in which ongoing interactions with people from multiple generations become the norm and re experience how enriching intergenerational relationships are personally and communally

Bridging the Generation Gap Linda Gravett, Robin Throckmorton, 2007-01-01 If you are a manager human resources professional or business owner you are faced with these types of issues every day But why Because currently there are five generations in the workplace Radio Babies born during 1930 1945 Baby Boomers 1946 1964 Generation X 1965 1976 Generation Y 1977 1991 even some Millennials 1991 and later Each of them has a different perspective based on their upbringing and daily lives The key to making encounters between the generations successful is learning to understand the point of view of each generation and respect their differences The individuals and organizations that do this will be the ones to succeed This book will show you how Authors Gravett and

Throckmorton take a dynamic approach to the situation by writing in two distinct voices as a Baby Boomer and a Gen Xer using a point counterpoint approach to identify differences and similarities across generations They share hands on experiences real life cases recommended solutions and ground breaking research on how members of any generation can better relate to minimize conflict miscommunication and wasted energy You will learn what each generation thinks of the others and how each wishes the others viewed it Bridging the Generation Gap is filled with strategies and solutions you can implement immediately to help build your own bridge between the generations **The American Journal of Science and Arts** ,1848
