Threatened Children Rhetoric And Concern About Child Victims:

Threatened Children Joel Best, 1993 Child abuse incest child molestation Halloween sadism child pornography although clearly not new problems they have attracted more attention than ever before Threatened Children asks why Joel Best analyzes the rhetorical tools used by child advocates when making claims aimed at raising public anxiety and examines the media's role in transmitting reformers' claims and the public's response to the frightening statistics compelling examples and expanding definitions it confronts Drawing on a wide range of sources from criminal justice records to news stories from urban legends to public opinion surveys Best reveals how the cultural construction of social problems evolves Publisher's description *Conquistadores de la Calle* Thomas A. Offit, 2009-09-15 The first comprehensive book length study of its kind *Conquistadores de la Calle* presents the findings of nearly two years of ethnographic research on the streets of Guatemala City toppling conventional wisdom that the region's youth workers are solely victims or that their labor situations are entirely the result of poverty and family breakdown Documenting the voices and experiences of the city's working children this fascinating study reveals counterintuitive motivations for those who choose to abandon schooling in favor of participating more fully in their families' economies The processes of developing skills and planning for their social and economic futures are covered in depth presenting evidence that many members of this population operate well above survival level and are decidedly not marginalized or members of an underclass *Conquistadores de la Calle* also makes important distinctions between these young workers a generation of Maya and Ladino boys and girls and the homeless children or gang youth who have been so much more widely studied Contextualizing a variety of data ranging from detailed ethnographic portraits of the children's lives and the monthly income of children engaged in common street vocations such as shining shoes or serving as porters to educational histories and socialization activities Thomas Offit has produced a rich trove of findings in a significant segment of urban economics that is tremendously important for anthropologists Latin Americanists and those interested in the lives and labors of children in the cities of the developing world *Parenting Out of Control* Margaret K. Nelson, 2012-03 They go by many names helicopter parents hovercrafts PFHs Parents from Hell Drawing on a wealth of eye opening interviews with parents across the country Margaret K. Nelson cuts through the stereotypes and hyperbole to examine the realities of what she terms parenting out of control Situating this phenomenon within a broad sociological context she finds several striking explanations for why today's prosperous and well educated parents are unable to set realistic boundaries when it comes to raising their children Analyzing the goals and aspirations parents have for their children as well as the strategies and technologies they use to reach them Nelson discovers fundamental differences among American parenting styles that expose class fault lines both within the elite and between the elite and the middle and working classes Today's parents are faced with unprecedented opportunities and dangers for their children and are evolving novel strategies to adapt to these changes this lucid and insightful work provides an authoritative examination of what happens when these new

strategies go too far **Accounts of Innocence** Joseph E. Davis, 2005 Since a new sensitivity and orientation to victims of injustice arose in the 1960s categories of victimization have proliferated Large numbers of people are now characterized and characterize themselves as sufferers of psychological injury caused by the actions of others In contrast with the familiar critiques of victim culture Accounts of Innocence offers a new and empirically rich perspective on the question of why we now place such psychological significance on victimization in people's lives Focusing on the case of adult survivors of childhood sexual abuse Joseph E Davis shows how the idea of innocence shaped the emergence of trauma psychology and continues to inform accounts of the past and hopes for the future in therapy with survivor clients His findings shed new light on the ongoing debate over recovered memories of abuse They challenge the notion that victim accounts are an evasion of personal responsibility And they suggest important ways in which trauma psychology has had unintended and negative consequences for how victims see themselves and for how others relate to them An important intervention in the study of victimization in our culture Accounts of Innocence will interest scholars of clinical psychology social work and sociology as well as therapists and victim activists
