Software engineering is understood as a broad term linking science traditional engineering art and management and is additionally conditioned by social and external factors conditioned to the point that brilliant engineering solutions based on strong science showing artistic creativity and skillfully managed can still fail for reasons beyond the control of the development team Modern software engineering needs a paradigm shift commensurate with a change of the computing paradigm from 1 Algorithms to interactions and from procedural to object oriented programming 2 Systems development to systems integration 3 Products to services Traditional software engineering struggles to address this paradigm shift to interactions integration and services It offers only incomplete and disconnected methods for building information systems with fragmentary ability to dynamically accommodate change and to grow gracefully The principal objective of contemporary software engineering should therefore be to try to redefine the entire discipline and offer a complete set of methods tools and techniques to address challenges ahead that will shape the information systems of the future *ICASI 2020* Rahmat Hidayat, Mesran, Tengku Mohd Diansyah, Supriyanto, Dodi Siregar, Robbi Rahim, 2020-06-18 As an annual event The 3rd INTERNATIONAL CONFERENCE ON ADVANCE SCIENTIFIC INNOVATION ICASI 2020 continued the agenda to bring together researcher academics experts and professionals in examining selected theme by applying multidisciplinary approaches In 2020 this event will be held in 20 June at Garuda Plaza Hotel Medan The conference from any kind of stakeholders related with Management Economy Administration Business Tourism Policy Law Operation Management and all research in Social Science and Humanities Each contributed paper was refereed before being accepted for publication The double blind peer reviewed was used in the paper selection *Proceedings of the International Conference on Advance Research in Social and Economic Science (ICARSE 2022)* Hyeyun Ku, Bobur Sobirov, Dyah Sugandini, Mochammad Tanzil Multazam, 2023-04-26 This is an open access book Theme Optimizing the use of social science and economics in the post pandemic revival era The Covid 19 pandemic is slowly starting to be overcome Contributions from various disciplines are also needed in the context of post pandemic recovery including the fields of social science and economics Thus the International Conference on Advanced Research in Social and Economic Science is a forum for researchers and practitioners to exchange ideas and advances on how emerging research methods and sources are applied to various fields of the social sciences as well as discuss current and future challenges Join the social sciences conference as we explore the latest trends in social
