Abi-Mershed,2018-06-01 Social Currents in North Africa is a multi disciplinary analysis of the social phenomena unfolding in the Maghreb today The contributors analyse the genealogies of contemporary North African behavioral and ideological norms and offer insights into post Arab Spring governance and today s social and political trends The book situates regional developments within broader international currents without forgoing the distinct features of each socio historical context With its common historical cultural and socio economic foundations the Maghreb is a cohesive area of study that allows for greater understanding of domestic developments from both single country and comparative perspectives This volume refines the geo historical unity of the Maghreb by accounting for social connections both within the nation state and across political boundaries and historical eras It illustrates that non institutional phenomena are equally formative to the ongoing project of post colonial sovereignty to social construction and deployments of state power and to local outlooks on social equity economic prospects and cultural identity **International Armed Conflict Since 1945** Herbert K.
