Trauma William C. Wilson, Christopher M. Grande, David B. Hoyt, 2007-02-05 Compiled by internationally recognized experts in trauma critical care this source discusses the entire gamut of critical care management of the trauma patient and covers several common complications and conditions treated in surgical intensive care units that are not specifically related to trauma Utilizing evidence based guidelines where they exist

Pediatric Critical Care Medicine Derek S. Wheeler, Hector R. Wong, 2007 This new textbook is the definitive evidence based resource for pediatric critical care It is the first ostensibly evidence based pediatric critical care textbook and will prove an invaluable resource for critical care professionals across the globe

West's Respiratory Physiology John B. West, 2015

The Respiratory Tract in Pediatric Critical Illness and Injury Derek S. Wheeler, Hector R. Wong, Thomas P. Shanley, 2008-12-18 The principal role of the respiratory system is to permit efficient exchange of respiratory gases O₂ and CO₂ with the environment The respiratory system is unique in that it is constantly exposed to a barrage of foreign substances from both the internal environment at any one point in time approximately one half of the cardiac output is received by the lungs and the external environment with each breath the respiratory tract is exposed to pollens viruses bacteria smoke etc According to the Centers for Disease Control and Prevention diseases of the respiratory system were the seventh and eighth leading causes of deaths in children aged 1 to 19 years in 2003

1 Dr George A Gregory one of the founding fathers of pediatric critical care medicine once estimated that acute respiratory failure accounts for nearly 50% of all admissions to the pediatric intensive care unit PICU

2 Just as important are the many diseases that affect the respiratory system that are not associated with acute respiratory failure but nevertheless constitute a major portion of the practice of pediatric critical care medicine some of which account for significant morbidity and mortality

3 Once again we would like to dedicate this textbook to our families and to the physicians and nurses who provide steadfast care every day in pediatric intensive care units across the globe
