Whales And Dolphins Of The World:

Whales and Dolphins of the World Mark P. Simmonds, 2013 This is a new redesigned and reformatted edition of a popular title Whales and dolphins or cetaceans have captivated and intrigued humankind for centuries They are incredibly diverse and have evolved a fascinating range of specializations to allow them despite being air breathing mammals to exploit habitats ranging from the surface waters to the abyssal depths Whales and Dolphins of the World is a stunningly illustrated celebration of their variety there are over 80 species behaviour and natural history It describes what we know of their lives such as feeding reproduction communication and social structures and outlines the factors that affect them from hunting to pollution The strong relationship between humans and cetaceans is also considered with a look at dolphin therapy as are the pros and cons of whale and dolphin watching and what makes a good trip A map of the world highlights the waters in which these mammals are found

Whales and Dolphins Andrew Cleave, 1994 A richly illustrated and thoroughly researched celebration of the best loved and most misunderstood mammal on our planet

Whales, Dolphins and Porpoises Jody Byrum, 1998 What's the difference between a baleen and toothed whale How can I tell the difference between a dolphin and porpoise Which cetaceans are endangered and needs our help to survive All of these questions and more will be answered in this detailed full color book

Dolphins, Porpoises and Whales of the World International Union for Conservation of Nature and Natural Resources, 1991

Whales and Dolphins of the World Devon Publishing Company, Incorporated, The, 1997-10-01

Whales and Dolphins of the World Mark Simmonds, 2007 Are spiders hairy scary monstrosities or just another animal trying to make a living With over 100 different families and 40 000 individual species spiders are among the most successful creatures on the planet They live almost everywhere from the Arctic tundra to equatorial rainforest and come in a diverse range of shapes and sizes from the tiny Patu digua measuring less than half a millimetre to the immense chicken eating spider which can reach a span of 28 cms 11 inches Many species of spider live in close proximity to man which partly explains the ambivalence or even fear that many people feel for them Spiders looks at arachnids in a new way shedding light on the fascinating lives of these complex and highly adaptable creatures Illustrated throughout with stunning photographs author Paul Hillyard lifts the lid on the complex world of spiders from their hunting strategies and amazing web spinning skills to their extraordinary courtship displays and devoted care for their young Written in an engaging educational and thought provoking style Spiders also looks at why people are scared of spiders why such fear is generally misplaced and why we should be doing more to look after endangered spider species

Killer Whale Natalie Lunis, 2010-01-01 Many people think that whales and dolphins are two different kinds of animals but they are not Every animal in the dolphin family is a kind of whale The killer whale is the largest dolphin in the world and can grow up to 32 feet 10 m long That's about as long as five tall adults lying end to end Killer whales are sometimes called the wolves of the sea Like wolves they hunt in groups and work together to catch their prey These dolphins are big eaters a large adult can eat 500 pounds 227 kg of food

each day In Killer Whale The World s Largest Dolphin large color photos and grade appropriate text will engage young readers as they learn about the natural habitat physical characteristics diet life cycle and behavior of this super sized dolphin A comparison diagram is also included to show readers the animal in relation to a familiar object Marine Protected Areas for Whales, Dolphins, and Porpoises Erich Hoyt,2012 Erich Hoyt s handbook is an admirable timely and highly welcome contribution Michael Stachowitsch Marine Ecology What does it mean to save the whales if their habitat is left unprotected Marine Protected Areas for Whales Dolphins and Porpoises is the definitive handbook on this pressing issue and the first to bridge the gap between the disciplines of marine protected areas and cetacean conservation It launches a new chapter in cetacean conservation with its investigation into the crucial habitat needs and protection requirements of some 84 species The author one of the world s foremost experts in this field takes you around the world to investigate the promising results of the latest conservation research and the strategies for obtaining marine protected areas in coastal waters and on the high seas using national legislation and regional and international conventions This is an essential introduction guide and reference work for those working to ensure a future for whales and dolphins Dolphins, Whales, and Porpoises Randall R. Reeves,2003 *Dolphins Around the World* Bobbie Kalman,2003 There are more than 30 species of dolphins Some are oceanic some coastal and some are river dolphins All dolphins are whales but not all whales are dolphins Children will be surprised to learn about the different kinds of dolphins that live around the world and find out which ones are true dolphins This book will clarify many misconceptions *Exploring Nature* Robin Kerrod,2014-01-22 Covers all aspects of cetacean life and biology including anatomy survival hunting and feeding intelligence sounds and song breeding conservation and much more with stunning photographs and illustrations this fact packed book is perfect for 8 to 12 year olds at home or school
