What is a Parent Andrew Bainham, Shelley Day Sclater, Martin Richards, 1999-07-01 This collection of essays is the product of a series of seminars held at the University of Cambridge in 1998 under the auspices of the newly formed Cambridge Socio Legal Group The book presents an interdisciplinary exploration of the nature of parenthood and its various manifestations in contemporary society It is divided into three sections dealing respectively with defining parenthood new issues in contemporary parenting and parenting post divorce Each contributor addresses the central question What is a Parent from the perspective of his or her own discipline thus bringing together ideas about parents derived from law sociology psychology biology and criminology Despite the familiar and apparently obvious answer to this question the notion of parent emerges from the analysis as a contested concept Definitions are various and fluid parenting practices are by no means fixed and ideologies which frame who parents are and what they do are subject to disruptions from several quarters In short the essays in this book show the ways in which parent like child is a term with a shifting meaning and parenthood refers to a fluid set of social practices which are historically and culturally situated Contributors Andrew Bainham Carol Brayne Stuart Bridge Rachel Cook Shelley Day Sclater Margaret Ely Loraine Gelsthorpe Susan Golombok Jack Goody Jonathan Herring Felicia Huppert Allison James Martin Johnson Bridget Lindley Mavis Maclean Juliet Mitchell Ros Pickford Martin Richards Wendy Solomou Candida Yates [Handbook of Parenting](#) Marc H. Kerig, 2014-06-03 Gain a better understanding of parent child boundaries and the mechanisms for their dissolution The breakdown of appropriate generational boundaries between parent and child can threaten the child's psychological development *Implications of Parent Child Boundary Dissolution for Developmental Psychopathology Who Is the Parent and Who Is the Child* explores this covert and oftentimes ignored form of emotional abuse discussing in detail the various ways it can manifest This revealing text comprehensively examines how the burden of meeting the emotional needs of the parent interferes with the child's healthy development The boundary dissolution patterns of role reversal enmeshment psychological control and triangulation are closely examined with an eye toward providing appropriate strategies for dealing with the problem *Implications of Parent Child Boundary Dissolution for Developmental Psychopathology* is separated into four

sections to focus extensively on every aspect of the problem. The first section discusses definitions, concepts, and methodological concerns of the phenomena, including a consideration of the child's developmental responses to boundary dissolution. The second section explores the empirical research concerning boundary dissolution within the family system and includes intriguing information on the actual mechanism that passes the pattern of role reversal on to the following generation. The next section closely examines boundary violations within high risk families with a focus on those undergoing divorce. The final section concentrates on cultural contexts of boundary dissolution and includes a look at the perception of familial responsibility and its effects on Bosnian youths. This one-of-a-kind resource is extensively referenced and provides a solid foundation to inspire a new generation of theory research and clinical work.

Implications of Parent-Child Boundary Dissolution for Developmental Psychopathology examines a multidimensional model of boundary dissolution with supporting research, a comprehensive review of published literature in the areas of attachment theory, developmental capacities of the infant, child-rearing practices, and parental beliefs, the theoretical background supporting the construct of boundary dissolution, the boundary disturbance patterns of enmeshment and control, the relationships between interparental conflict, parental responses to children's emotions, and representations of role reversal and vulnerability in children's family drawings, the spill-over effect of marital conflict, role reversal in high risk families, children's rejection of one parent over another in custody disputes, post-war adjustment of Bosnian adolescents, psychological control in individualist and collectivist groups, representations of parents and children in twentieth-century American novels.

Implications of Parent-Child Boundary Dissolution for Developmental Psychopathology is crucial reading for researchers and clinicians who deal with families and psychopathology and is of particular interest to graduate students in clinical child psychology, child and family studies, social work, and developmental psychology.
