**What Blood Won't Tell** Ariela J. Gross, 2008-10-31 Is race something we know when we see it In 1857 Alexina Morrison a slave in Louisiana ran away from her master and surrendered herself to the parish jail for protection Blue eyed and blond Morrison successfully convinced white society that she was one of them When she sued for her freedom witnesses assured the jury that she was white and that they would have known if she had a drop of African blood Morrison s court trial and many others over the last 150 years involved high stakes freedom property and civil rights And they all turned on the question of racial identity Over the past two centuries individuals and groups among them Mexican Americans Indians Asian immigrants and Melungeons have fought to establish their whiteness in order to lay claim to full citizenship in local courtrooms administrative and legislative hearings and the U S Supreme Court Like Morrison s case these trials have often turned less on legal definitions of race as percentages of blood or ancestry than on the way people presented themselves to society and demonstrated their moral and civic character Unearthing the legal history of racial identity Ariela Gross s book examines the paradoxical and often circular relationship of race and the perceived capacity for citizenship in American society This book reminds us that the imaginary connection between racial identity and fitness for citizenship remains potent today and continues to impede racial justice and equality

**Fatal Invention** Dorothy Roberts, 2011-06-14 An incisive groundbreaking book that examines how a biological concept of race is a myth that promotes inequality in a supposedly post racial era Though the Human Genome Project proved that human beings are not naturally divided by race the emerging fields of personalized medicine reproductive technologies genetic genealogy and DNA databanks are attempting to resuscitate race as a biological category written in our genes This groundbreaking book by legal scholar and social critic Dorothy Roberts examines how the myth of race as a biological concept revived by purportedly cutting edge science race specific drugs genetic testing and DNA databases continues to undermine a just society and promote inequality in a supposedly post racial era Named one of the ten best black nonfiction books 2011 by AFRO com Fatal Invention offers a timely and provocative analysis Nature of race science and politics that is consistently lucid alarming but not alarmist controversial but evidential impassioned but rational Publishers Weekly starred review Everyone concerned about social justice in America should read this powerful book Anthony D Romero executive director American Civil Liberties Union A terribly important book on how the fatal invention has terrifying effects in the post genomic post racial era Eduardo Bonilla Silva professor of sociology Duke University and author of Racism Without Racists Color Blind Racism and the Persistence of Racial Inequality in the United States Fatal Invention is a triumph Race has always been an ill defined amalgam of medical and cultural bias thinly overlaid with the trappings of contemporary scientific thought And no one has peeled back the layers of assumption and deception as lucidly as Dorothy Roberts Harriet A Washington author of and Deadly Monopolies The Shocking Corporate Takeover of Life Itself
