Wild Justice The Moral Lives Of Animals:

Wild Justice Marc Bekoff, Jessica Pierce, 2024-05-31 A compelling case that humans are not the only species with moral intelligence based on years of research into animal behavior Discover Scientists have long counseled against interpreting animal behavior in terms of human emotions warning that such anthropomorphizing limits our ability to understand animals as they really are Yet what are we to make of a female gorilla in a German zoo who spent days mourning the death of her baby Or a wild female elephant who cared for a younger one after she was injured by a rambunctious teenage male Or a rat who refused to push a lever for food when he saw that doing so caused another rat to be shocked Aren't these clear signs that animals have recognizable emotions and moral intelligence With *Wild Justice* Marc Bekoff and Jessica Pierce unequivocally answer yes Marrying years of behavioral and cognitive research with compelling and moving anecdotes Bekoff and Pierce reveal that animals exhibit a broad repertoire of moral behaviors including fairness empathy trust and reciprocity Underlying these behaviors is a complex and nuanced range of emotions backed by a high degree of intelligence and surprising behavioral flexibility Animals in short are incredibly adept social beings relying on rules of conduct to navigate intricate social networks that are essential to their survival Ultimately Bekoff and Pierce draw the astonishing conclusion that there is no moral gap between humans and other species morality is an evolved trait that we unquestionably share with other social mammals Sure to be controversial *Wild Justice* offers not just cutting edge science but a provocative call to rethink our relationship with and our responsibilities toward our fellow animals This well thought out provocative work will give scientific and lay readers plenty of examples to rethink and open new paths of research into the lives and minds of animals Choice I will never be able to look at a dog or a cat or a cow or a coyote for that matter in the same way again Telegraph An excellent introduction to a new science Booklist

Wild Justice Jessica Pierce, 2010-10-19 Scientists have long counseled against interpreting animal behavior in terms of human emotions warning that such anthropomorphizing limits our ability to understand animals as they really are Yet what are we to make of a female gorilla in a German zoo who spent days mourning the death of her baby Or a wild female elephant who cared for a young

After Darwin: Animals, Emotions, and the Mind Angelique Richardson, 2013-11-10 What is emotion pondered the young Charles Darwin in his notebooks How were the emotions to be placed in an evolutionary framework And what light might they shed on human animal continuities These were among the questions Darwin explored in his research assisted both by an acute sense of observation and an extraordinary capacity for fellow feeling not only with humans but with all animal life After Darwin *Animals Emotions and the Mind* explores questions of mind emotion and the moral sense which Darwin opened up through his research on the physical expression of emotions and the human animal relation It also examines the extent to which Darwin's ideas were taken up by Victorian writers and popular culture from George Eliot to the Daily News Bringing together scholars from biology literature history psychology psychiatry and paediatrics the volume provides an invaluable reassessment of Darwin's contribution to a

new understanding of the moral sense and emotional life and considers the urgent scientific and ethical implications of his ideas today

Beastly Morality Jonathan K. Crane, 2015-12-01 We have come to regard nonhuman animals as beings of concern and we even grant them some legal protections But until we understand animals as moral agents in and of themselves they will be nothing more than distant recipients of our largesse Featuring original essays by philosophers ethicists religionists and ethologists including Marc Bekoff Frans de Waal and Elisabetta Palagi this collection demonstrates the ability of animals to operate morally process ideas of good and bad and think seriously about sociality and virtue Envisioning nonhuman animals as distinct moral agents marks a paradigm shift in animal studies as well as philosophy itself Drawing not only on ethics and religion but also on law sociology and cognitive science the essays in this collection test long held certainties about moral boundaries and behaviors and prove that nonhuman animals possess complex reasoning capacities sophisticated empathic sociality and dynamic and enduring self conceptions Rather than claim animal morality is the same as human morality this book builds an appreciation of the variety and character of animal sensitivities and perceptions across multiple disciplines moving animal welfarism in promising new directions

The Oxford Handbook of Animal Ethics Tom L. Beauchamp, (1941-2012) R.G. Frey, 2011-03-01 Humans encounter and use animals in a stunning number of ways The nature of these animals and the justifiability or unjustifiability of human uses of them are the subject matter of this volume Philosophers have long been intrigued by animal minds and vegetarianism but only around the last quarter of the twentieth century did a significant philosophical literature begin to be developed on both the scientific study of animals and the ethics of human uses of animals This literature had a primary focus on discussion of animal psychology the moral status of animals the nature and significance of species and a number of practical problems This Oxford Handbook is designed to capture the nature of the questions as they stand today and to propose solutions to many of the major problems Several chapters in this volume explore matters that have never previously been examined by philosophers The authors of the thirty five chapters come from a diverse set of philosophical interests in the History of Philosophy the Philosophy of Mind the Philosophy of Biology the Philosophy of Cognitive Science the Philosophy of Language Ethical Theory and Practical Ethics They explore many theoretical issues about animal minds and an array of practical concerns about animal products farm animals hunting circuses zoos the entertainment industry safety testing on animals the status and moral significance of species environmental ethics the nature and significance of the minds of animals and so on They also investigate what the future may be expected to bring in the way of new scientific developments and new moral problems This book of original essays is the most comprehensive single volume ever published on animal minds and the ethics of our use of animals

[The Next Social Contract](#) Wayne Gabardi, 2017-05-15 In his provocative book *The Next Social Contract* Wayne Gabardi rigorously considers the fate of animals in the twenty first century He claims that if we are to address the challenges raised by the Anthropocene the period where nonhuman beings tend to be mere extras often subsumed under the umbrella notion of

nature we need to radically rethink our basic ethical outlook and develop a new more than human social contract Gabardi's wide ranging and multidisciplinary analysis focuses on four principal battlegrounds of animal biopolitics in the twenty first century the extinction of wild animals the crisis of oceanic animals industrialized farm animals and the future of industrial agribusiness and the situation of contact zone animals moving into human occupied habitats In his recasting of the social contract Gabardi envisions a culture shift in human animal relations toward posthumanism that features the ethical and political prioritization of animal life so it is on par with that of human well being

Theological Ethics through a Multispecies Lens Celia E. Deane-Drummond, 2019-11-05 There are two driving questions informing this book The first is where does our moral life come from It presupposes that considering morality broadly is inadequate Instead different aspects need to be teased apart It is not sufficient to assume that different virtues are bolted onto a vicious animality red in tooth and claw Nature and culture have interlaced histories By weaving in evolutionary theories and debates on the evolution of compassion justice and wisdom it shows a richer account of who we are as moral agents The second driving question concerns our relationships with animals Deane Drummond argues for a complex community based multispecies approach Hence rather than extending rights a more radical approach is a holistic multispecies framework for moral action This need not weaken individual responsibility She intends not to develop a manual of practice but rather to build towards an alternative philosophically informed approach to theological ethics including animal ethics The theological thread weaving through this account is wisdom Wisdom has many different levels and in the broadest sense is connected with the flow of life understood in its interconnectedness and sociality It is profoundly theological and practical In naming the project the evolution of wisdom Deane Drummond makes a statement about where wisdom may have come from and its future orientation But justice compassion and conscience are not far behind especially in so far as they are relevant to both individual decision making and institutions

[The American Naturalist](#), 2009 *New Scientist*, 2009 **American Journal of Play**, 2008 **Social Theory and Practice**, 2015-04 **A Communion of Subjects** Paul Waldau, Kimberley Christine Patton, 2006 A Communion of Subjects is the first comparative and interdisciplinary study of the conceptualization of animals in world religions Scholars from a wide range of disciplines consider how major religious traditions have incorporated animals into their belief systems myths rituals and art Their findings offer profound insights into humans relationships with animals and a deeper understanding of the social and ecological web in which we all live Contributors examine Judaism Christianity Islam Hinduism Buddhism Jainism Daoism Confucianism African religions traditions from ancient Egypt and early China and Native American indigenous Tibetan and Australian Aboriginal traditions among others They explore issues such as animal consciousness suffering sacrifice and stewardship in innovative methodological ways They also address contemporary challenges relating to law biotechnology social justice and the environment By grappling with the nature and ideological features of various religious views the contributors cast religious teachings and practices in a

new light They reveal how we either intentionally or inadvertently marginalize others whether they are human or otherwise reflecting on the ways in which we assign value to living beings *University of British Columbia Law Review* University of British Columbia,2016 **The Literary Review** ,2009 **Official Meeting Program** Ecological Society of America.
