Willard Oxtoby World Religions Eastern Traditions:

World Religions Willard Gurdon Oxtoby, 2002 This second edition of *World Religions Western Traditions* examines in detail the major Western religious traditions Judaism Zoroastrianism Christianity and Islam Each tradition is explored in depth from its origins through its development to the religion's meaning and practice in today's society *World Religions* Willard Gurdon Oxtoby, 1996 An introduction to the religious traditions of South Asian and East Asian origin including the Aboriginal traditions of Asia and the Pacific The historical development of each religious tradition is outlined and issues on which adherents have differed among themselves are identified **World Religions** Willard G. Oxtoby, 1996

Problematizing Religious Freedom Arvind Sharma, 2011-08-08 The concept of religious freedom is the favoured modern human rights concept with which the modern world hopes to tackle the phenomenon of religious pluralism as our modern existence in an electronically shrinking globe comes to be increasingly characterised by this phenomenon To begin with the concept of religious freedom as embodied in Article 18 of the Universal Declaration of Human Rights seems self evident in nature It is the claim of this book however that although emblematic on the one hand the concept is also problematic on the other and the implications of the concept of religious freedom are far from self evident despite the ready acceptance the term receives as embodying a worthwhile goal This book therefore problematizes the concept along legal constitutional ethical and theological lines and especially from the perspective of religious studies so that religious freedom in the world could be enlarged in a way which promotes human flourishing The World of the Axial Sages John C. Stephens, 2020-11-25 This book presents an engaging analysis of the global spiritual changes of the first millennium BCE Between the sixth and fourth centuries BCE several new revolutionary religious and philosophic movements were born throughout the world Rather than using the well known label Axial Age to refer to this time of religious change the book argues that a better choice would be the Age of Awakening since it places more emphasis upon the personal internal dimension of religious experience lying at the core of these developments Earthshattering spiritual encounters with the sacred led the prophets and sages of the Age of Awakening to redirect people's attention away from the stagnant traditions of the past towards new forms of dynamic spirituality The era saw the emergence of a variety of innovative spiritual pathways in both the eastern and western worlds In classical Greece Pythagoras and Plato proposed new spiritual and intellectual alternatives to the outdated religious myths and rituals of the polis The Middle East also played a significant role in the spiritual revolution of the first millennium BCE As early as the sixth century BCE the Persian prophet Zoroaster's revelatory visions about the Truth and the Lie led to the birth of a new religious movement known as Zoroastrianism At the time of the Babylonian Exile ancient Judaism underwent a process of radical spiritual renewal largely due to the inspired teachings of the Hebrew prophets In India the writers of the Upanishads provided a spiritual reinterpretation of many of the old Vedic myths and rituals Sages including the Buddha and Mahavira rejected the old sacrificial system of the brahmins and asserted

that liberation from the cycle of birth and death could only be found through the practice of asceticism and a general withdrawal from the illusory material world As such this book highlights the importance of the de stabilizing influences of religious experience for understanding the revolutionary spiritual developments of the first millennium BCE [Fabricating Religion](#) Russell T. McCutcheon,2018-09-24 The revised essays collected here four of which are published for the first time continue a longstanding argument made by McCutcheon and others that the study of religion would benefit from self conscious scrutiny of its tools the interests that may drive them and the effects that might follow their use The chapters examine a variety of contemporary sites in the modern field where this thesis can be argued whether involving the anachronistic use of of the category religion when studying the ancient world to current interest in so called critical religion or critical realist approaches Moreover contrary to some past characterizations of such critiques a constructive way forward for the field is once again recommended and at several sites exemplified in detail redescribing not only religion as something ordinary but also our tendency to create the impression of exceptional and thus set apart things places and people Aimed at scholars and students alike the book is an invitation to examine our own scholarly practices and thereby take a more active role in shaping the field in which we carry out our work as scholars of this thing we call religion **Encyclopedia of Religion** Lindsay Jones,2005 This second edition which is intended to reflect both changes in academia and in the world since 1987 includes almost all of the 2 750 original entries many heavily updated as well as approximately 600 entirely new articles It emphasizes religion s role within everyday life and as a unique experience from culture to culture [Paradise and Paradigm](#) Christopher Buck,1999-05-13 Comparing paradise imagery in two Persian religions early Syriac Christianity and the Baha i Faith this work contributes to religious studies methodology by introducing symbolic paradigm analysis **A Concise Introduction to World Religions** Willard Gurdon Oxtoby,Alan F. Segal,2007 In addition to abridging the contents of the two best selling World Religions volumes Eastern Traditions and Western Traditions contributors to this concise volume text have reworked the original material to focus on six specific areas of analysis the major origins of the movement the crystallization of its teachings the major divisions within the tradition how adherents practice their faith cultural expressions and how the tradition has responded to the various changes intellectual social technological of modern times This more structural approach will make it easier for students to compare and contrast traditions resulting in a solid well rounded introduction to the study of world religions [Critics Not Caretakers](#) Russell T. McCutcheon,2023-11-30 The essays collected together in Critics Not Caretakers argue that the study of religion must be rethought as an ordinary aspect of social historical existence a stance that makes the scholar of religion a critic of cultural and historical practices rather than a caretaker of religious tradition or a font of timeless wisdom and deep meaning The book begins with several essays that outline the basis of an alternative sociorhetorical approach to studying religion before moving on to a series of discrete dispatches from the ongoing theory wars each of which uses the work of such writers as Karen Armstrong Walter Burkert

Benson Saler and Jacob Neusner as a point of entry into wider theoretical issues of importance to the field's future. The author then examines the socio-political role of this brand of critical scholarship, a role that differs dramatically from the type of sympathetic caretaking generally associated with scholars of religion who feel compelled to go public. Concluding the work is a consideration of how scholars as teachers can address issues of theory, method, and critical thinking in a variety of undergraduate classrooms, the location where they have always been publicly accountable intellectuals. The new edition of this still read and for some controversial book preserves the original essays but includes a new opening chapter and new introductory commentaries across all of the chapters to demonstrate how little the field has changed since the volume was first published in 2001. Accordingly, the book continues to provide a viable alternative for those wanting to take a more critical approach to the study of religion.
