stymie wind power development Case studies which examine phlegmatic wind power development in Japan Taiwan Australia and Canada are presented in order to demonstrate to the reader how these barriers manifest themselves in practice Second the book presents an analysis of STEP catalysts which have been linked to successful growth of wind power capacity in select nations Four more case studies that examine the successful development of wind power in Denmark Germany the USA and China are put forth as practical examples of how supportive factors conflate to produce conditions that are conducive to growth of wind power markets By examining its impediments and catalysts the book will provide policymakers with insight into the types of factors that must be effectively managed in order to maximize wind power development **Electric Power**
