Will Standards Save Public Education:

Will Standards Save Public Education? Deborah Meier, 2000-04-24 Somewhere there is a place of sanity where education is intense and substantive It s in that place that Deborah Meier has been working all these years Her voice conveys a life of struggle in the front lines victories and losses hopes and disappointments It s a voice our nation needs to hear Jonathan Kozol from the Foreword Acclaimed educator Deborah Meier offers a fresh take on standardized tests While others have criticized standards and what they measure Meier rejects the very idea of a centralized authority that dictates how and what teachers teach Standardization she argues prevents citizens including teachers from emerging as thoughtful responsible adults seriously engaged with shaping their own schools classrooms and communities As a result young people can t learn from them how to be thoughtful responsible adults and good citizens the primary goal of public education in a democracy The New Democracy Forum is a series of short paperback originals exploring creative solutions to our most urgent national concerns A civic treasure A truly good idea carried out with intelligence and panache Robert Pinsky

Elusive Justice Thea Renda Abu El-Haj, 2012-12-06 Elusive Justice addresses how educators think about and act upon differences in schools be they based on race gender class or disability and how discourse and practice about such differences are intimately bound up with educational justice Rather than skip over contentious or uncomfortable dialogues about difference Thea Abu El Haj tackles them head on Through rich and detailed ethnographic portraits of two schools with a commitment to social justice she analyzes the ways discourses about difference provide a key site for both producing and resisting inequalities and examines the dilemmas that emerge from either focusing on or ignoring them In interrogating fundamental assumptions about difference and equity Abu El Haj deftly blends critique with a search for hope and possibility to ultimately argue for ways educators might translate ideals about justice into effective practice

Critical Issues in Education Jack L. Nelson, Stuart B. Palonsky, Mary Rose McCarthy, 2017-07-27 Few subjects engender more strongly held beliefs and contrary views than education The outcomes of debates over education and educational reform impact all citizens Media coverage of these controversies is sometimes shallow and one sided fostering the need to develop critical thinking skills These skills in turn open opportunities for personal growth joining the public debate and helping others participate in critical discussions The authors of Critical Issues in Education present two opposing positions for each of sixteen different hot button issues including multiculturalism school finance charter schools teacher evaluation cyberbullying and gender equity Prospective teachers will find the authors approach eye opening and stimulating Ideally they will teach these valuable skills to their students who will prosper academically and personally from understanding and considering diverse viewpoints

Who Decides Who Becomes a Teacher? Julie Gorlewski, Eve Tuck, 2018-11-09 Who Decides Who Becomes a Teacher extends the discussions and critiques of neoliberalism in education by examining the potential for Schools of Teacher Education to contest policies that are typical in K 12 schooling Drawing on a case study of faculty collaboration this edited volume reimagines teacher preparation

programs as crucial sites of resistance to and refusal of unsound education practices and legislation This volume also reveals by example how education faculty can engage in collaborative scholarly work to investigate the anticipated and unanticipated effects of policy initiatives on teaching and learning *Metropedagogy*, 2006-01-01 What might it mean to develop a rigorous just and practical urban education Such a question takes on new importance in the middle of the first decade of the twenty first century as urban educators find themselves besieged with test driven standardized curricula promoted in the name of fairness educational excellence and egalitarianism Those who promote these standardized curricula fail to account for the unique situations and needs of particular urban students When an urban curriculum is standardized the students suffering from the effects of poverty racial discrimination and other problems are less likely to receive the specific pedagogical help they need to overcome the effects of such impediments Such students have special needs Teachers need the curricular freedom the professional respect to address these special requirements *Metropedagogy* constructed as a critical pedagogy for urban education addresses these concerns This book will be very useful as a text in urban education at the graduate and the undergraduate level *No Excuses* Abigail Thernstrom, Stephan Thernstrom, 2004-10 The racial gap in academic performance between whites and Asians on the one hand and Latinos and blacks on the other hand is America s most urgent educational problem It is also the central civil rights issue of our time say Abigail and Stephan Thernstrom Unequal skills and knowledge are the main sources of ongoing racial inequality and racial inequality is America s great unfinished business A wide and tragic gap in learning is evident in affluent suburbs as well as inner cities But great schools are scattered across the country as described in inspiring detail by the Thernstroms These schools are putting even the most highly disadvantaged children on the American ladder of economic opportunity There are no good excuses for the perpetuation of long standing inequalities the Thernstroms argue eloquently The problem can be solved but conventional strategies will not work Fundamental educational reform is needed Carefully researched accessibly written and powerfully persuasive this book offers both a close analysis of the current landscape and a blueprint for essential and overdue change
