Economics for Middle School Manju Agarwal, 2022-07-04 This book discusses the importance of teaching fundamental economic concepts as part of the middle school social science curriculum in India. It examines the status of economics in Indian schools and the issues faced in teaching it at the middle school level and emphasizes the need for increasing the economic literacy of students. It offers valuable recommendations to curriculum planners and educators to help them bolster economics education in Indian schools. The author presents an extensive curriculum framework with the intention of developing intellectual and social skills in students. The book also features classroom-tested lessons, content guidelines, and a comprehensive teaching plan for grades 6, 7, and 8. A crucial contribution to the study of school education in India, this book will be of interest to teachers, students, and researchers of education, economics education, and economics. It will also be useful for policy planners, professional economists, administrators, school boards, and research institutions. **Making Economics**

Public Vicki Macknight, Fabien Medvecky, 2023-05-22 Economics, macro, micro, and mysterious is integral to everyday life. But despite its importance for personal and collective decision making, it is a discipline often viewed as technical, arcane, and inaccessible and thus overlooked in public discourse. This book is a call to arms to bring the discipline of economics more into the public domain. It calls on economists to think about how to make their knowledge of the economics public. And it calls on those who specialise in communicating expert knowledge to help us learn to communicate about economics. The book brings together scholars and practitioners working at the early stages of an emerging field: the public communication of and public engagement with economics. Through a series of short essays from academics and practitioners, the book has two key goals: first and foremost, it will make a case for why we need to make economics public and for the importance of having a clear vision of what it means to make economics public. Secondly, it suggests some ways that this can be done, featuring contributions from practitioners including economists who are engaging audiences in newspapers, museums, and beyond. This book is essential reading for those in economics with an interest in making economics public and those already in the many fields dedicated to communicating expert knowledge in public spaces who have an interest in where economics can fit.
