"Marriage in the Modern Manner" Christina Clare Simmons,1982 *Making Marriage Modern* Christina Simmons,2009-04-10 The nineteenth century middle class ideal of the married woman was of a chaste and diligent wife focused on being a loving mother with few needs or rights of her own The modern woman by contrast was partner to a new model of marriage one in which she and her husband formed a relationship based on greater sexual and psychological equality In *Making Marriage Modern* Christina Simmons narrates the development of this new companionate marriage ideal which took hold in the early twentieth century and prevailed in American society by the 1940s The first challenges to public reticence to discuss sexual relations between husbands and wives came from social hygiene reformers who advocated for a scientific but conservative sex education to combat prostitution and venereal disease A more radical group of feminists anarchists and bohemians opposed the Victorian model of marriage and even the institution of marriage Birth control advocates such as Emma Goldman and Margaret Sanger openly championed women s rights to acquire and use effective contraception The companionate marriage emerged from these efforts This marital ideal was characterized by greater emotional and sexuality intimacy for both men and women use of birth control to create smaller families and destigmatization of divorce in cases of failed unions Simmons examines what she calls the flapper marriage in which free spirited young wives enjoyed the early years of marriage postponing children and domesticity She looks at the feminist marriage in which women imagined greater equality between the sexes in domestic and paid work and sex And she explores the African American partnership marriage which often included wives employment and drew more heavily on the involvement of the community and extended family Finally she traces how these modern ideals of marriage were promoted in sexual advice literature and marriage manuals of the period Though male dominance persisted in companionate marriages Christina Simmons shows how they called for greater independence and satisfaction for women and a new female heterosexuality By raising women s expectations of marriage the companionate ideal also contained within it the seeds of second wave feminists demands for transforming the institution into one of true equality between the sexes

New Books on Women and Feminism ,1989 **The Politics of Irony in American Modernism** Matthew

Stratton, 2013-11-01 Shortlisted for the 2015 Modernist Studies Association Book Prize This book shows how American literary culture in the first half of the twentieth century saw irony emerge as a term to describe intersections between aesthetic and political practices Against conventional associations of irony with political withdrawal Stratton shows how the term circulated widely in literary and popular culture to describe politically engaged forms of writing It is a critical commonplace to acknowledge the difficulty of defining irony before stipulating a particular definition as a stable point of departure for literary cultural and political analysis This book by contrast is the first to derive definitions of irony inductively showing how writers employed it as a keyword both before and in opposition to the institutionalization of New Criticism It focuses on writers who not only composed ironic texts but talked about irony and satire to situate their work politically Randolph Bourne Benjamin De Casseres Ellen Glasgow John Dos Passos Ralph Ellison and many others The Writers Directory, 2013
