Probably Overthinking It Allen B. Downey, 2023-12-06

Teacher data scientist and blogger Allen B Downey knows well that the human mind has both an innate ability to understand statistics and to be fooled by them Statistically speaking you will be less popular than your friends arrive at a train station during a gap in service and fail to find a running mate in a race But more than surprising us errors in statistical thinking Downey shows can have a huge impact Statistical confusion has led to incorrect patient prognoses caused mistakes in predicting disasters like earthquakes hurt vaccination programs hindered social justice efforts and led to dubious policy decisions Written for those who may have once taken a statistics course but now forget almost everything they ve learned the book includes a diversity of examples that use real data and have real world impacts Building understanding incrementally Downey engagingly and accessibly helps readers understand what we might learn when we get the mathematics right and the consequences when we get it all wrong

Bayesian Modeling and Computation in Python Osvaldo A. Martin, Ravin

Kumar, Junpeng Lao, 2021-12-28 Bayesian Modeling and Computation in Python aims to help beginner Bayesian practitioners to become intermediate modelers It uses a hands on approach with PyMC3 Tensorflow Probability ArviZ and other libraries focusing on the practice of applied statistics with references to the underlying mathematical theory The book starts with a refresher of the Bayesian Inference concepts The second chapter introduces modern methods for Exploratory Analysis of Bayesian Models With an understanding of these two fundamentals the subsequent chapters talk through various models including linear regressions splines time series Bayesian additive regression trees The final chapters include Approximate Bayesian Computation end to end case studies showing how to apply Bayesian modelling in different settings and a chapter about the internals of probabilistic programming languages Finally the last chapter serves as a reference for the rest of the book by getting closer into mathematical aspects or by extending the discussion of certain topics This book is written by contributors of PyMC3 ArviZ Bambi and Tensorflow Probability among other libraries
