Thinking in time R. E. Neustadt, *THINKING IN TIME: THE USES OF HISTORY FOR DECISION MAKERS*, 1986

Generalship, Historical Perspectives, 2008 After World War I J F C Fuller stated that the three pillars of generalship meaning good generalship of course are courage creative intelligence and physical fitness and the attributes of youth rather than middle age The study of character traits and leadership principles dominated our thought and leadership teaching methodology during and after World War II with role playing and case studies used extensively Current leadership doctrine for the entire Army is prescribed in Field Manual 6 22 Army Leadership a publication that relies heavily on historical examples for its message Since the foundations of Army leadership are firmly grounded in history senior leaders must have a core of historical knowledge to give them the perspective necessary to solve the leadership and command challenges of today

Making a Leadership Change TN. Gilmore, 2003 **How Societies Embrace Information Technology** James W. Cortada, 2010-03-02 This book discusses how computers are shaping contemporary society with a tight focus on the role of corporations and governments It is aimed at government policymakers interested in economic development and at private sector managers who routinely make decisions to acquire and use information technology now a worldwide expenditure of over 2 trillion annually The book will also interest a wide range of academics concerned with the sociology history economics and the effects of IT on contemporary society and to the general trade market **US Foreign Policy Decision-Making from Truman to Kennedy** A. Hybel, 2014-03-12 The book has three objectives to expose students to the ways different US presidents handled major foreign policy making problems to test the explanatory value of alternative decision making models And to reintroduce students to a wide range of critical US foreign policy issues **The French Revolutionary Tradition in Russian and Soviet Politics, Political Thought, and Culture** Jay Bergman, 2019-08-14 Because they were Marxists the Bolsheviks in Russia both before and after taking power in 1917 believed that the past was prologue that embedded in history was a Holy Grail a series of mysterious but nonetheless accessible and comprehensible universal laws that explained the course of history from beginning to end Those who understood these laws would be able to mould the future to conform to their own expectations But what should the Bolsheviks do if their Marxist ideology proved to be either erroneous or insufficient if it could not explain or explain fully the course of events that followed the revolution they carried out in the country they called the Soviet Union Something else would have to perform this function The underlying argument of this volume is that the Bolsheviks saw the revolutions in France in 1789 1830 1848 and 1871 as supplying practically everything Marxism lacked In fact these four events comprised what for the Bolsheviks was a genuine Revolutionary Tradition The English Revolution and the Puritan Commonwealth of the seventeenth century were not without utility the Bolsheviks cited

them and occasionally utilized them as propaganda but these paled in comparison to what the revolutions in France offered a century later namely legitimacy inspiration guidance in constructing socialism and communism and not least useful fodder for political and personal polemics
