Thinking The Unthinkable Think Tanks And The Economic Counter Revolution 1931 83:

Three Roads to the Welfare State Bryan Fanning, 2021-09-03 The development of social policy in Europe is explored in this accessible intellectual history and analysis of the welfare state From the Industrial Revolution onwards the book identifies three important concepts behind efforts to address social concerns in Europe social democracy Christian democracy and liberalism With guides to the political and ideological protagonists and the beliefs and values that lie behind reforms it traces the progress and legacies of each of the three traditions For academics and students across social policy and the political economy this is an illuminating new perspective on the welfare state through the last two centuries

Nine Lives of Neoliberalism Philip Mirowski, Dieter Plehwe, Quinn Slobodian, 2020-05-05 Untangling the long history of neoliberalism Neoliberalism is dead Again Yet the philosophy of the free market and the strong state has an uncanny capacity to survive and even thrive in times of crisis Understanding neoliberalism s longevity and its latest permutation requires a more detailed understanding of its origins and development This volume breaks with the caricature of neoliberalism as a simple unvariegated belief in market fundamentalism and homo economicus It shows how neoliberal thinkers perceived institutions from the family to the university disagreed over issues from intellectual property rights and human behavior to social complexity and monetary order and sought to win consent for their project through the creation of new honors disciples and networks Far from a monolith neoliberal thought is fractured and occasionally even at war with itself We can begin to make sense of neoliberalism s nine lives only by understanding its own tangled and complex history

Inventing the Silent Majority in Western Europe and the United States Anna von der Goltz, Britta Waldschmidt-Nelson, 2019-03-28 For historians of social movements this text explores 1960s and 1970s conservative political activism in the US and Western Europe

The Road from Mont Pèlerin Philip Mirowski, Dieter Plehwe, 2015-11-16 What exactly is neoliberalism and where did it come from This volume attempts to answer these questions by exploring neoliberalism s origins and growth as a political and economic movement Now with a new preface

Meanings of the Market James G. Carrier, 2020-05-28 For almost twenty years the Free Market has been a central feature of public debate in the West Eastern Europe and elsewhere In the name of the Market and its supposed benefits governments and international agencies have imposed massive changes on peoples lives Curiously scholars have paid little attention to the ways that the idea of the Market is invoked to what it might mean and how it is being used This book helps correct that state of affairs Focusing on the United States where the Market model is strongest authors analyze portrayals of the Market its values and the people within it as a way of teasing out its assumptions and contradictions They also describe extensions and practical applications of the Market model in policy making in the United States and in explaining how firms work show its political strengths and conceptual limitations In bringing rigor and sustained critical analysis to a topic of growing global significance this truly interdisciplinary study represents a coherent and incisive contribution to anthropology sociology politics history and economics as it challenges

these disciplines to come to grips with one of the most potent cultural symbols of postmodernity **Building Chicago**

Economics Robert Van Horn, Philip Mirowski, Thomas A. Stapleford, 2011-10-17 Over the past forty years economists associated with the University of Chicago have won more than one third of the Nobel prizes awarded in their discipline and have been major influences on American public policy Building Chicago Economics presents the first collective attempt by social science historians to chart the rise and development of the Chicago School during the decades that followed the Second World War Drawing on new research in published and archival sources contributors examine the people institutions and ideas that established the foundations for the success of Chicago economics and thereby positioned it as a powerful and controversial force in American political and intellectual life **Britain's Conservative Right since 1945** Kevin

Hickson, 2019-10-23 Winner of the Political Studies Association Conservatism Studies Group prize 2020 This book provides a detailed analysis of the evolution of the Conservative Right in Great Britain since 1945 It first explores the movement's core ideas and highlights points of tension between its different strands The book then proceeds with a thematically structured discussion The Conservative Right's views on the decline and fall of the British Empire immigration control European integration the British constitution the territorial integrity of the United Kingdom Britain's economy the welfare state and social morality and social change are all explored In the concluding chapter the author evaluates the extent to which the Conservative Right has succeeded in its core objectives since 1945 and addresses how it can best respond to a contemporary Britain in which it instinctively feels uncomfortable The book is based on extensive elite interviews and archival research and will be of interest to anyone who seeks to place the contemporary Conservative Right in a greater historical context Left

and Right Ana Rita Ferreira, João Cardoso Rosas, 2014-01-08 The great dichotomy between left and right has been a feature of pluralist politics since its emergence in modern times Left and right are also central to the understanding of the political history of the twentieth century and may be gaining renewed visibility in the context of the current economic crisis both in Europe and beyond Should scholars think once again with and within the dichotomy or can they think better beyond its strictures The contributions to this volume provide answers to these and other questions in ways that are theoretically sound and empirically informed *Making Things Happen* Gerald Frost, 2015-03-17 Before he was forty Nigel Vinson inventor

entrepreneur philanthropist and farmer had achieved what many struggle to achieve in a lifetime He had created and built up a successful company based on his own ideas floated it on the stock exchange and made more than enough money to never have to work again But instead of retiring Vinson forged a unique career in British public life as he sought to find answers to the daunting political and economic problems confronting Britain This was partly achieved through the wider application of ideas he had developed when running his own business but also by helping funding and cooperating with others he judged capable of making a contribution to the country's recovery We have it on the authority of Margaret Thatcher herself that Thatcherism would never have happened without the Centre for Policy Studies the think tank Vinson

helped her establish This biography tells the story of a man whose influence both direct and indirect has been considerably greater than is widely realised He is a man who saw through the fashionable shibboleths of his day but was often ahead of the trend a man whose do as you would be done by moral philosophy enormously practical nature and infectious enthusiasm have been fundamental to his continued success Nigel Vinson is a man who has made things happen and he continues to do so to this day

The Politics of Street Trees Jan Woudstra, Camilla Allen, 2022-03-17 This book focuses on the politics of street trees and the institutions actors and processes that govern their planning planting and maintenance This is an innovative approach which is particularly important in the context of mounting environmental and societal challenges and reveals a huge amount about the nature of modern life social change and political conflict The work first provides different historical perspectives on street trees and politics celebrating diversity in different cultures A second section discusses street tree values policy and management addressing more contemporary issues of their significance and contribution to our environment both physically and philosophically It explores cultural idiosyncrasies and those from the point of view of political economy particularly challenging the neo liberal perspectives that continue to dominate political narratives The final section provides case studies of community engagement civil action and governance International case studies bring together contrasting approaches in areas with diverging political directions or intentions the constraints of laws and the importance of people power By pursuing an interdisciplinary approach this book produces an information base for academics practitioners politicians and activists alike thus contributing to a fairer political debate that helps to promote more democratic environments that are sustainable equitable comfortable and healthier

Theories of the Information Society Frank Webster, 2014-03-21 Information is regarded as a distinguishing feature of our world Where once economies were built on industry and conquest we are now part of a global information economy Pervasive media expanding information occupations and the development of the internet convince many that living in an Information Society is the destiny of us all Coping in an era of information flows of virtual relationships and breakneck change poses challenges to one and all In *Theories of the Information Society* Frank Webster sets out to make sense of the information explosion taking a sceptical look at what thinkers mean when they refer to the Information Society and critically examining the major post war approaches to informational development The fourth edition of this classic study brings it up to date with new research and with social and technological changes from the Twitter Revolutions of North Africa to financial crises that introduced the worst recession in a life time to the emergence of social media and blogging and reassesses the work of key theorists in the light of these changes More outspoken than in previous editions Webster urges abandonment of Information Society scenarios preferring analysis of the informatization of long established relationships This interdisciplinary book is essential reading for those trying to make sense of social and technological change in the post war era It addresses issues of central concern to students of sociology politics geography communications information science cultural studies computing and librarianship

Post-work Helen Hester, Will Stronge, 2025-01-23 What does the future hold for work in our new age of crisis How do we make sure that the uncertain future into which we are heading is heavenly and not hellish How can we take the pleasures of work with us and eliminate the pains The answer we need a post work vision Questioning the received wisdom that work is good for you that you are what you do and that any job is a good job Post work offers a new challenge to the work centred society This timely book provides a vital introduction to the post work debate one of the most exciting political and theoretical currents of recent years It explores not only what the future of work will be like but more importantly what the future of work should be like

Climate Change and Society Riley E. Dunlap, Robert J. Brulle, 2015-08-24 Climate change is one of the most critical issues of the twenty first century presenting a major intellectual challenge to both the natural and social sciences While there has been significant progress in natural science understanding of climate change social science analyses have not been as fully developed Climate Change and Society breaks new theoretical and empirical ground by presenting climate change as a thoroughly social phenomenon embedded in behaviors institutions and cultural practices

Dollars for Dixie Katherine Rye Jewell, 2017-04-24 In Dollars for Dixie Katherine Rye Jewell demonstrates how conservative southern industrialists pursued a political campaign to preserve regional economic arrangements

Neoliberalism and the Moral Economy of Fraud David Whyte, Jörg Wiegratz, 2016-05-26 There is evidence that economic fraud has in recent years become routine activity in the economies of both high and low income countries Many business sectors in today s global economy are rife with economic crime Neoliberalism and the Moral Economy of Fraud shows how neoliberal policies reforms ideas social relations and practices have engendered a type of sociocultural change across the globe which is facilitating widespread fraud This book investigates the moral worlds of fraud in different social and geographical settings and shows how contemporary fraud is not the outcome of just a few bad apples Authors from a range of disciplines including sociology anthropology and political science social policy and economics employ case studies from the Global North and Global South to explore how particular values morals and standards of behaviour rendered dominant by neoliberalism are encouraging the proliferation of fraud This book will be indispensable for those who are interested in political economy development studies economics anthropology sociology and criminology

Towards a Market in Broadcasting C. Potschka, 2012-03-27 A comparative analysis of the evolution of UK and German broadcasting policies adding to the developing area of comparative research on media and communications policy The book focuses on processes of marketization and liberalization as they have affected policy making national regulatory frameworks and media structures

Social Opulence and Private Restraint Noel Thompson, 2015-08-06 Social Opulence and Private Restraint is a study of the place of the consumer and consumption in the political economy of British socialism from its early nineteenth century origins through New Times Marxism to the consumer focused New Labourism and political economies critical of consumerism that can be found in the late twentieth and early twenty first century Left Noel Thompson identifies and

explicates recurrent themes which cross the boundaries of the conventional periodisation of the history of British socialist thought themes which illustrate the sustained nature of the multifaceted ideological challenge presented by the accommodation of the consumer within socialist political economy This challenge necessitates an engagement with the character and priorities of a future socialist society As such it touches on some of the key issues which socialists have confronted in pursuit of their vision of a good society issues with a strong contemporary relevance such as the desirability of private as against social opulence the relationship between consumption and happiness the need to educate and or to liberate desire and in particular the environmental and social consequences of rising levels of consumer expectation and consumption The study also throws light on how the disparate ways in which these issues were addressed reflected and shaped the socialist political economies that emerged in the nineteenth and twentieth centuries while also engendering tensions between them

Unwitting Architect Julian Germann, 2021-01-05 The global rise of neoliberalism since the 1970s is widely seen as a dynamic originating in the United States and the United Kingdom and only belatedly and partially repeated by Germany From this Anglocentric perspective Germany's emergence at the forefront of neoliberal reforms in the eurozone is perplexing and tends to be attributed to the same forces conventionally associated with the Anglo American pioneers This book challenges this ruling narrative conceptually and empirically It recasts the genesis of neoliberalism as a process driven by a plenitude of actors ideas and interests And it lays bare the pragmatic reasoning and counterintuitive choices of German crisis managers that are obscured by this master story Drawing on extensive original archival research this book argues that German officials did not intentionally set out to promote neoliberal change Instead they were more intent on preserving Germany's export markets and competitiveness in order to stabilize the domestic compact between capital and labor Nevertheless the series of measures German policy elites took to manage the end of golden age capitalism promoted neoliberal transformation in crucial respects it destabilized the Bretton Woods system it undermined socialist and social democratic responses to the crisis in Europe it frustrated an internationally coordinated Keynesian reflation of the world economy and ultimately it helped push the US into the Volcker interest rate shock that inaugurated the attack on welfare and labor under Reagan and Thatcher From this vantage point the book illuminates the very different rationale behind the painful reforms German state managers have demanded of their indebted eurozone partners The Oxford

Handbook of Comparative Environmental Politics Jeannie Lynn Sowers, Stacy D. VanDeveer, Erika Weinthal, 2023 Including 42 chapters organized across 9 sections The Oxford Handbook of Comparative Environmental Politics explores some of the most important environmental issues through the lens of comparative politics including energy climate change food health urbanization waste and sustainability The chapters delve into more traditional forms of comparative environmental politics CEP the political economy of natural resources and the role of corporations and supply chains while also showcasing new trends in CEP scholarship particularly the comparative study of environmental injustice and intersectional inequities The

Handbook highlights scholarship from a broader range of regions and includes approaches from political science anthropology sociology geography gender theory law human rights and development studies **New Earth Politics** Simon Nicholson, Sikina Jinnah, 2016-03-04 Prominent scholars and practitioners consider the role of global environmental politics in the face of increasing environmental stress Humanity's collective impact on the Earth is vast The rate and scale of human driven environmental destruction is quickly outstripping our political and social capacities for managing it We are in effect creating an Earth 2.0 on which the human signature is everywhere a new earth in desperate need of humane and insightful guidance In this volume prominent scholars and practitioners in the field of global environmental politics consider the ecological and political realities of life on the new earth and probe the field's deepest and most enduring questions at a time of increasing environmental stress Arranged in complementary pairs the essays in this volume include reflections on environmental pedagogy analysis of new geopolitical realities reflections on the power of social movements and international institutions and calls for more compelling narratives to promote environmental action At the heart of the volume is sustained attention to the role of traditional scholarly activities in a world confronting environmental disaster Some contributors make the case that it is the scholar's role to provide activists with the necessary knowledge and tools others argue for more direct engagement and political action All the contributors confront the overriding question What is the best use of their individual and combined energies given the dire environmental reality Contributors Erik Assadourian Frank Biermann Wil Burns Ken Conca Peter Dauvergne Daniel Deudney Navroz Dubash Richard Falk Joyeeta Gupta Maria Ivanova Peter Jacques Sikina Jinnah Karen T Litfin Michael F Maniates Elizabeth Mendenhall Simon Nicholson Kate O'Neill Judith Shapiro Paul Wapner Oran R Young
