Man disconnected: why young men are struggling and what we can do about it Philip Zimbardo, 2020 Free Speech Law and the Pornography Debate Lynn Mills

Eckert, 2020-06-26 By examining the highly contested legal debate about the regulation of pornography through an epistemic lens this book analyzes competing claims about the proper role of speech in our society pornography's harm the relationship between speech and equality and whether law should regulate and if so upon what grounds In maintaining that inegalitarian pornography generates discursive effects the book contends that law cannot simply adopt a libertarian approach to free speech While inegalitarian pornography may not be determinative of gender inequality it does contribute reinforce reflect and help maintain such unfairness As a result we can place reasonable gender based regulations on inegalitarian pornography while upholding our most treasured commitments to dissident speech just as other liberal democracies with strong free speech traditions have done

Games of History Apostolos Spanos, 2021-06-13 Games of History provides an understanding of how games as artefacts textual and visual sources on games and gaming as a pastime or a serious activity can be used as sources for the study of history From the vast world of games the book's focus is on board and card games with reference to physical games sports and digital games as well Considering culture society politics and metaphysics the author uses examples from various places around the world and from ancient times to the present to demonstrate how games and gaming can offer the historian an alternative often very valuable and sometimes unique path to the past The book offers a thorough discussion of conceptual and material approaches to games as sources while also providing the reader with a theoretical starting point for further study within specific thematic chapters The book concludes with three case studies of different types of games and how they can be considered as historical sources the gladiatorial games chess and the digital game Civilization Offering an alternative approach to the study of history through its focus on games and gaming as historical sources this is the ideal volume for students considering different types of sources and how they can be used for historical study as well as students who study games as primary or secondary sources in their history projects

A Psychology of User Experience Phil Turner, 2017-12-02 It is well established that while cognitive psychology provides a sound foundation for an understanding of our interactions with digital technology this is no longer sufficient to make sense of how we use and experience the personal relational and ubiquitous technologies that pervade everyday life This book begins with a consideration of the nature of experience itself and the user experience UX of digital technology in particular offering a new broader definition of the term This is elaborated through a wide ranging and rigorous review of what are argued to be the three core UX elements These are involvement including shared sense making familiarity appropriation and being with technologies affect including emotions with and about technology impressions feelings and mood and aesthetics including embodied aesthetics and neuroaesthetics Alongside this new insights are introduced into how and why much of our current

use of digital technology is simply idling or killing time A particular feature of the book is a thorough treatment of parallel and sometimes competing accounts from differing academic traditions Overall the discussion considers both foundational and more recent theoretical and applied perspectives from social psychology evolutionary psychology folk psychology neuroaesthetics neuropsychology the philosophy of technology design and the fine arts This broad scope will be enlightening and stimulating for anyone concerned in understanding UX A Psychology of User Experience stands as a companion text to the author's HCI Redux text which discusses the contemporary treatment of cognition in human computer interaction
