Emotional Learning with Content Sarah Bright, Katherine Kapustka, 2024-12-11 This book provides a framework for creatively and effectively teaching social and emotional learning across content areas in grades 3-5 using illustrated texts such as graphic novels, manga, and picture books. Thoughtful book choices that reflect the range of diversities found in classrooms and communities help support students as they develop their academic skills and provide opportunities to address their unique socio-emotional needs. Covering theoretical context, the benefits of using graphic texts to activate important cognitive structures, as well as specific techniques and advice for implementation, this book makes pairing effective diverse books with thoughtfully designed standards-aligned lessons encouragingly simple. Packed with adaptable lesson plans, book lists, differentiated activities, and more, this book is a must-read for educators seeking truly integrated learning experiences that meet all learners' academic and social and emotional learning (SEL) needs.

Integrating Computational Thinking Through Design-Based Learning Mustafa Saritepeci, Hatice Yildiz Durak, 2025-01-02 This book creates a theoretical framework to consider the integration of computational thinking (CT) into learning and teaching processes in different contexts from a design-based learning (DBL) perspective and presents various intervention studies. The chapters each focus on a different aspect of CT integration through DBL, providing an overview and discussing the benefits of integrating CT into the curriculum. The book also discusses the design thinking process and how it can be used to promote CT, focusing on CT concepts and considering perspectives on how these concepts can be integrated into DBL activities. It also explores how artificial intelligence (AI)-based design-oriented learning activities can be used to develop students' CT skills. Examines the information technology (IT) concept of pattern recognition and provides examples of how this can be integrated into DBL activities. It presents practical examples on integrating CT into the teaching-learning process from a design-based learning perspective, summarizes approaches to assessing CT skills, and discusses them in the context of design-based learning. Lastly, this book also conducts a bibliometric analysis of publication and citation trends in computational thinking research conducted in design-based learning.
