Does God Exist? I Do-Do Not Believe (This Book is for You) Craig J. Radford,2023-02-09 Does science prove God s existence or provide more reasons to doubt Does God truly exist That is the age old seemingly unanswerable question But what if there was an answer What if the answer has been staring us right in the face for centuries but we ve been too busy missing the forest for the trees This book invites you to take a step back and look at the broader picture It offers anecdotes observations and most importantly scientific evidence of the universal all encompassing culture transcending purpose that connects us all In that purpose we find many paths to a knowledge that has eluded humankind for as long as we have had the ability to wonder proof that God does indeed exist We find this knowledge in the stars in the nature of time in the laws of physics in our own bodies and in equations as complex as advanced calculus and unconditional love It s just a matter of knowing where and how to look In a centuries old debate that has always placed science in an adversarial role with faith this book brings the two camps together using logic and reason to prove the existence of God For the atheist these pages eschew scriptural references in favor of evolutionary philosophical cultural and natural evidence For the believer this book enhances your faith with affirmative arguments steeped in mathematics particle physics and a host of other scientific and real world observations And for anyone who has ever looked up at the sky and wondered what might lie beyond this book provides a clear compelling life affirming answer Desire is the starting point of all achievement not a hope not a wish but a keen pulsating desire which transcends everything Napoleon Hill As a secularist and humanist who doesn t share the same conclusions I was surprised with what an enjoyable read this is This is the strongest summary to date that I ve seen for the Theist position Jeremy Runnells author of the CES Letter Written through a Euro centric philosophical and western science lens one has the opportunity to consider not only the argument for and against the belief in a God but to contemplate a middle ground where the dualities of such sit squarely within the most important part of the equation the one who asks the question This book is a worthwhile read particularly for those seeking to dive more deeply into the self Jonathan Webb Dr of Theology

F. Cleugh,2021-09-17 Originally published in 1962 the purpose of this

book was to examine the working of the educative process when it is concerned with older people not with children prisoners willing or unwilling of a system of basic education but voluntary contractors not green pliable saplings but sturdy and sometimes unbending timber in short adults with an outlook on life already formed often with family responsibilities and with a store of past experience special interests training or expertise The teaching of older people does not consist merely of the adaptation of the methods applicable to school or college to the intellectual level of those to whom time and opportunity may have given an already broad understanding theoretical or empirical of a variety of subjects The teaching of adults must take full account of method but whatever the context is also much concerned with the interrelations between individuals in groups and with changes in the individuals themselves For the adult in the main the purpose of education is improvement this may imply a feeling of dissatisfaction with standards already achieved or a strong determination to reach new educational goals for specific reasons connected with status or advancement These factors often bring with them into the setting of the adult class anxieties tensions feelings of inadequacy or burdens of responsibility that overshadow the learning process because of the importance of the outcome Habits and attitudes may already have been formed that stand in the way of assimilating new patterns and techniques of learning This book is concerned with the social and psychological factors of which account must be taken in approaching the teaching of adults It considers methods of teaching and of learning and proceeds to inquire into the deeper attitudinal influences at work both in the teacher and in the student Throughout the book theory is illustrated by the liberal use of examples The author has also attempted to go beyond the particular to the general and to discuss the issues and principles that apply over a wide field of education and indeed of management Thus the scope and usefulness of the book are not confined solely to the tutorial situation but extend to those fields in which problems of group relations and leadership are to be found within the context of training or of management
