Thetics and Categoricals Werner Abraham, Elisabeth Leiss, Yasuhiro Fujinawa, 2020-07-22 Thetics and Categoricals do not belong to the categories of German grammar Thetics were introduced in logic as impersonal and broad focus constructions They left profound and extensive traces in the logic of the late 19th century For the class of thetic propositions the criterion of textual exclusion plays the major role i e the absence of any common grounds and of any anaphorism and background In the foreground are sentences with subject inversion subject suppression and detopicalization These and only these are suitable for text beginnings jokes stage advertisements and solipsistic exclamatives thus speech acts without communicative goals free expressives in the true sense of the word The contributions in this volume not only guide the reader through the history of philosophical logic and distributions of impersonals in contrast to Kantian categorical sentences but also the correspondences in Japanese and Chinese which in contrast to German and English sport specific morphological markers for thetics as opposed to categoricals

Constructive Adpositional Grammars Marco Benini, Federico Gobbo, 2011-05-25 This book presents a new paradigm of natural language grammar analysis based on adposition as the key concept considered a general connection between two morphemes or group of morphemes The adpositional paradigm considers the morpheme as the basic unit to represent morphosyntax taken as a whole in terms of constructions while semantics and pragmatics are treated accordingly All linguistic observations within the book can be described through the methods and tools of Constructive Mathematics so that the modelling becomes formally feasible A full description in category theoretic terms of the formal model is provided in the Appendix A lot of examples taken from natural languages belonging to

different typological areas are offered throughout the volume in order to explain and validate the modeling with special attention given to ergativity Finally a first real world application of the paradigm is given i e conversational analysis of the transcript of therapeutic settings in terms of constructive speech acts The main goal of this book is to broaden the scope of Linguistics by including Constructive Mathematics in order to deal with known topics such as grammaticalization children s speech language comparison dependency and valency from a different perspective It primarily concerns advanced students and researchers in the field of Theoretical and Mathematical Linguistics but the audience can also include scholars interested in applications of Topos Theory in Linguistics

The Semantics of Generics in Dutch and Related Languages Albert M. Oosterhof,2008-04-25 This monograph is a comprehensive study of the various ways in which genericity can be expressed in Dutch dialects of Dutch and languages related to Dutch On the basis of empirical corpus and questionnaire

based data a wide range of topics are discussed which have been addressed in the literature on the semantics and pragmatics of generics The empirical data presented in this book shed new light on issues crucial to the study of genericity A number of widely accepted ideas are shown to be problematic For example arguments are presented against the well known claim that progressive forms typically exclude characterizing interpretations Furthermore the author shows that speakers do not agree in their judgements of the acceptability of bare plurals as well as other noun phrase types in generic contexts Such data are a problem for the influential thesis that bare plurals refer to kinds unambiguously
