Das Problem der Topologie des Dimensionalitätsbegriffs, d. h. der
Möglichkeit, zwischen einer n -dimensionalen Mannigfaltigkeit und einer
($n + 1$)-dimensionalen Mannigfaltigkeit ($n > 0$) eine eindeutige und
stetige Abbildung herzustellen, ist im Jan. 1912 in Göttingen gelöst

Topology A First Course:

Topology; a First Course James R. Munkres, 1974 For a one or two semester introduction to topology at the senior or first year graduate level A First Course in Topology Robert A Conover, 2014-02-20 Students must prove all of the theorems in this undergraduate level text which focuses on point set topology and emphasizes continuity The final chapter explores homotopy and the fundamental group 1975 edition *Topology* James R. Munkres, 2000 For a senior undergraduate or first year graduate level course in Introduction to Topology Appropriate for a one semester course on both general and algebraic topology or separate courses treating each topic separately This text is designed to provide instructors with a convenient single text resource for bridging between general and algebraic topology courses Two separate distinct sections one on general point set topology the other on algebraic topology are each suitable for a one semester course and are based around the same set of basic core topics Optional independent topics and applications can be studied and developed in depth depending on course needs and preferences Algebraic Topology William Fulton, 1997-09-05 To the Teacher This book is designed to introduce a student to some of the important ideas of algebraic topology by emphasizing the relations of these ideas with other areas of mathematics Rather than choosing one point of view of modern topology homotopy theory simplicial complexes singular theory axiomatic homology differential topology etc we concentrate our attention on concrete problems in low dimensions introducing only as much algebraic machinery as necessary for the problems we meet This makes it possible to see a wider variety of important features of the subject than is usual in a beginning text The book is designed for students of mathematics or science who are not aiming to become practicing algebraic topologists without we hope discouraging budding topologists We also feel that this approach is in better harmony with the historical development of the subject What would we like a student to know after a first course in topology assuming we reject the answer half of what one would like the student to know after a second course in topology Our answers to this have guided the choice of material which includes understanding the relation between homology and integration first on plane domains later on Riemann surfaces and in higher dimensions winding numbers and degrees of mappings fixed point theorems applications such as the Jordan curve theorem invariance of domain in spaces of vector fields and Euler characteristics fundamental groups Algebraic Topology Max K. Agoston, 1976 **Topology** James R. Munkres, 1997 **Topology** James R. Munkres, 1976 **Algebraic Topology** Marvin J. Greenberg, 2018-03-05 Great first book on algebraic topology Introduces cohomology through singular theory *A First Course in Algebraic Topology* Czes Kosniowski, 1980-09-25 This self contained introduction to algebraic topology is suitable for a number of topology courses It consists of about one quarter general topology without its usual pathologies and three quarters algebraic topology centred around the fundamental group a readily grasped topic which gives a good idea of what algebraic topology is The book has emerged from courses given at the University of Newcastle upon Tyne to senior undergraduates and beginning

postgraduates It has been written at a level which will enable the reader to use it for self study as well as a course book The approach is leisurely and a geometric flavour is evident throughout The many illustrations and over 350 exercises will prove invaluable as a teaching aid This account will be welcomed by advanced students of pure mathematics at colleges and universities Topology; a First Course [By] James R.
