Tools For Strengths Based Assessment And Evaluation:

Tools for Strengths-Based Assessment and Evaluation Catherine A. Simmons, Peter Lehmann, 2012-11-08 Print CourseSmart [Tools for Strengths-Based Assessment and Evaluation](#) Catherine Simmons, 2012-11-08 Traditionally assessment and evaluation have focused on the negative aspects or deficits of a client's presentation. Yet strengths, health, and those things that are going right in a person's life are key protective factors in the prevention and treatment of many mental health problems. Thus measuring strengths is an important component of a balanced assessment and evaluation process. This is the first compendium of more than 140 valid and reliable strengths-based assessment tools that clinicians, researchers, educators, and program evaluators can use to assess a wide array of positive attributes including well-being, mindfulness, optimism, resilience, humor, aspirations, values, sources of support, emotional intelligence, and much more. These tools provide a clear picture of an individual's strengths while being easy to complete, score, and interpret. The scales and instruments included are consistently formatted, are organized according to construct measures, and include tools for working with adults, couples, families, children, and special populations. They represent a wide range of theoretical approaches and were written by a diverse array of professionals including social workers, psychologists, nurses, physicians, and sociologists.

Partial List of Instruments: Adult Dispositional Hope Scale, Assessing Emotions Scale, Flourishing Scale, Five Facet Mindfulness Questionnaire, Positive States of Mind Scale, A Measure of Expectations for Partner, Multidimensional Sense of Humor Scale, Parenting Sense of Competence Scale, Personal Wellbeing Index, Proactive Coping Inventory, Psychological Empowerment Scale, Stress-Related Growth Scale, Social Wellbeing Scales, Wellness Beliefs Scale.

Theoretical Perspectives for Direct Social Work Practice Nick Coady, Peter Lehmann, 2016-05-15 This expanded third edition of a popular textbook provides a completely revised and updated overview of the theories, models, and therapies that inform direct social work practice. The text is grounded in generalist social work principles and values and promotes a problem-solving model of social work practice as a framework for the eclectic use of theory as well as for integrating the artistic, reflective elements of practice. It provides in-depth coverage of select psychodynamic, cognitive-behavioral, humanistic, critical, and postmodern theories. The third edition features a new section on Critical Theories where a new chapter on Empowerment Theory is included with a completely revised chapter on Feminist Theory. A new chapter on Strengths-based Social Work has been added to the section on meta-theories for social work practice. Other new chapters include Emotion-focused Therapy and Collaborative Therapy. These revisions are based on suggestions from an extensive survey of professors.

New to the Third Edition: A new section on Critical Theories. New chapters on Strengths-based Social Work, Emotion-focused Therapy, Empowerment Theory, and Collaborative Therapy. Updated research on the debate about the importance of theory/technique versus common (e.g., relationship) factors and on the critique of the empirically supported treatment movement. Key Features: Grounds direct practice firmly in the principles and values of generalist social work. Promotes a problem-solving model of social work as a flexible structure for

integrating the eclectic use of theory with the artistic reflective elements of practice Organizes direct practice theories into like groupings and provides an overview of the main characteristics of each grouping Provides in depth coverage of topics in a clear logical and consistent format Includes editors and contributors from the U S and Canada
