The 'New' Documentary Nexus Anna Wiehl, 2019-05-23 In the last ten years the field of documentary has been subject to substantial paradigm shifts due to the rise of digital media practices This publication explores some central questions arising in this context Who are the different interactors networking within the new documentary nexus How can we conceptualize interactive documentary practices as encounters and dynamic interactions within digital media culture and beyond How can one methodologically approach this complex networked yet dynamic nexus in its constant flux Developing a coherent and expandable operational set of methods to describe and analyse paradigmatic cases this book addresses documentary theorists new media scholars and students of media and communication studies who want to gain a survey of current developments in the field of interactive documentary practices

The Computable City Michael Batty, 2024-03-26 How computers simulate cities and how they are also being embedded in cities changing our behavior and the way in which cities evolve At every stage in the history of computers and communications it is safe to say we have been unable to predict what happens next When computers first appeared nearly

seventy five years ago primitive computer models were used to help understand and plan cities but as computers became faster smaller more powerful and ever more ubiquitous cities themselves began to embrace them As a result the smart city emerged In *The Computable City* Michael Batty investigates the circularity of this peculiar evolution how computers and communications changed the very nature of our city models which in turn are used to simulate systems composed of those same computers Batty first charts the origins of computers and examines how our computational urban models have developed and how they have been enriched by computer graphics He then explores the sequence of digital revolutions and how they are converging focusing on continual changes in new technologies as well as the twenty first century surge in social media platform economies and the planning of the smart city He concludes by revisiting the digital transformation as it continues to confound us with the understanding that the city now a high frequency twenty four hour version of itself changes our understanding of what is possible

The Cultural Logic of Computation David Golumbia,2009-08-30 Advocates of computers make sweeping claims for their inherently transformative power new and different from previous technologies they are sure to resolve many of our existing social problems and perhaps even to cause a positive political revolution In *The Cultural Logic of Computation* David Golumbia who worked as a software designer for more than ten years confronts this orthodoxy arguing instead that computers are cultural all the way down that there is no part of the apparent technological transformation that is not shaped by historical and cultural processes or that escapes existing cultural politics From the perspective of transnational corporations and governments computers benefit existing power much more fully than they provide means to distribute or contest it Despite this our thinking about computers has developed into a nearly invisible ideology Golumbia dubs computationalism an ideology that informs our thinking not just about computers but about economic and social trends as sweeping as globalization Driven by a programmer s knowledge of computers as well as by a deep engagement with contemporary literary and cultural studies and

poststructuralist theory The Cultural Logic of Computation provides a needed corrective to the uncritical enthusiasm for computers common today in many parts of our culture New Media and the Nation in Malaysia Susan Leong, 2013-10-08

In the four decades or so since its invention the internet has become pivotal to how many societies function influencing how individual citizens interact with and respond to their governments Within Southeast Asia while most governments subscribe to the belief that new media technological advancement improves their nation's socio economic conditions they also worry about its cultural and political effects This book examines how this set of dynamics operates through its study of new media in contemporary Malaysian society Using the social imaginary framework and adopting a socio historical approach the book explains the varied understandings of new media as a continuing process wherein individuals and their societies operate in tandem to create negotiate and enact the meaning ascribed to concepts and ideas In doing so it also highlights the importance of non users to national technological policies Through its examination of the ideation and development of Malaysia's Multimedia Super Corridor mega project to date and reference to the seminal socio political events of 2007 2012 including the 2008 General Elections Bersih and Hindraf rallies this book provides a clear explanation for new media's prominence in the multi ethnic and majority Islamic society of Malaysia today It is of interest to academics working in the field of Media and Internet Studies and Southeast Asian Politics **Alternative Historiographies of the Digital**

Humanities Dorothy Kim, Adeline Koh, 2021 Alternative Historiographies of the Digital Humanities examines the process of history in the narrative of the digital humanities and deconstructs its history as a straight line from the beginnings of humanities computing By discussing alternative histories of the digital humanities that address queer gaming feminist game studies praxis Cold War military industrial complex computation the creation of the environmental humanities monolingual discontent in DH the hidden history of DH in English studies radical media praxis cultural studies and DH indigenous futurities Pacific Rim post colonial DH the issue of scale and DH the radical indigenous feminist histories of the digital database and the possibilities for an antifascist DH this collection hopes to re set discussions of the DH straight white origin myths Thus this collection hopes to reexamine the silences in such a straight and white masculinist history and how power comes into play to shape this straight white DH narrative Page 4 of cover **50 Ways to Understand Communication**

Arthur Asa Berger, 2006-02-16 Is consciousness like an iceberg Does advertising lead to the commodification of humans What is the hidden meaning of fairy tales In 50 Ways to Understand Communication Arthur Asa Berger familiarizes readers with important concepts written by leading communication and cultural theorists such as Saussure LZvi Strauss de Certeau Lasswell McLuhan Postman and many others Organized in fifty short segments this concise guide covers a wide range of important ideas from psychoanalysis and semiology to humor otherness and nonverbal communication Berger's clear explanations and examples surround this assortment of influential writing walking the uninitiated through these sometimes dense theoretical works His selections and commentary will challenge readers to reconsider the role of communication in our

culture This engaging accessible book is essential for students of communication and anyone interested in how we communicate in a world of rapidly changing media

The Net Effect Thomas Streeter, 2011 This book about America's romance with computer communication looks at the Internet not as a harbinger of the future or the next big thing but as an expression of the times Streeter demonstrates that our ideas about what connected computers are for have been in constant flux since their invention In the 1950s they were imagined as the means for fighting nuclear wars in the 1960s as systems for bringing mathematical certainty to the messy complexity of social life in the 1970s as countercultural playgrounds in the 1980s as an icon for what's good about free markets in the 1990s as a new frontier to be conquered and by the late 1990s as the transcendence of markets in an anarchist open source utopia The Net Effect teases out how culture has influenced the construction of the internet and how the structure of the internet has played a role in cultures of social and political thought
