particular place on Earth Although recognized as pseudoscience today horoscopes were once considered a cutting edge scientific tool Boxer teaches us how to read these esoteric charts and appreciate the complex astronomical calculations needed to generate them by diagramming how the heavens appeared at important moments in astrology's history from the assassination of Julius Caesar as viewed from Rome to the Apollo 11 lunar landing as seen from the surface of the Moon He then puts these horoscopes to the test using modern data sets and statistical science arguing that today's data scientists do work similar to astrologers of yore By looking back at the algorithms of ancient astrology he suggests we can better recognize the patterns that are timeless characteristics of our own pattern matching tendencies At once critical rigorous and far ranging A Scheme of Heaven recontextualizes astrology as a vast technological project spanning continents and centuries that foreshadowed our data driven world today
