Theory And Practice Of Brief Therapy:

Theory and Practice of Brief Therapy Simon H. Budman, Alan S. Gurman, 2016-03-14 This classic work provides a richly textured overview of the whys and hows of brief therapy. The authors identify the central features of effective time-limited interventions for individuals, couples, families, and groups. Taking a developmental approach to treatment, they explain how brief therapy can help at different times in a patient's life as changes and transitions bring on new stresses and challenges. A practical framework is provided for selecting and screening patients, rapidly finding a focus for clinical work, and making optimal use of available time. Case examples and extensive transcripts are included to illustrate the use of strategies and techniques drawn from many different psychotherapy perspectives. Throughout, the focus is on creative and efficient ways to help patients build on existing strengths and make desired changes in their interactions with others. **The First Session**

in Brief Therapy Simon H. Budman, Michael F. Hoyt, Steven Friedman, 1992-08-07 In all models of therapy, the initial interview is a significant component. It sets the tone, structure, direction, and foundation of treatment. In brief therapy, the opening moves are even more important because there is less time later to correct errors or change direction. This volume provides practitioners with an up-close view of exactly what expert brief therapists do at the beginning of treatment and why they do it. Each author describes his or her particular orientation, presents annotated transcripts of actual initial sessions, and responds to pointed questions from the editors about their cases. Following an introduction by the editors, the first section of the book covers initial sessions in therapies for individuals. These include the rational-emotive approach, a one-session intervention, an interpersonal psychodynamic model, neurolinguistic programming, and the I-D-E interpersonal developmental-existential approach. Beginning cognitive-behavioral therapy with depressed or drug-abusing adolescents is covered, and a directive approach strongly influenced by the work of Milton Erickson is presented. The next section addresses methods and strategies for working with couples and families. Chapters on marital therapy cover an integrative approach that combines an intra- and interpersonal focus in marital therapy, a cognitive-behavioral approach that is based on principles of social learning and social exchange theory, emotionally focused therapy, and an approach that utilizes reflective conversation. A solution-oriented model, the possibility paradigm for helping families amplify their strengths, is delineated, as is a strategic MRI-style model for working with an individual family member and a structural approach for creating familial change. An ideal companion to Budman's *THEORY AND PRACTICE OF BRIEF THERAPY*, this illuminating and unique casebook is essential reading for all clinicians who need to learn more about time-effective models. Offering a comparative view of a variety of models, it is an ideal text for undergraduate and graduate students. *Solution-Focused Therapy* Dr. Alasdair Macdonald, 2007-03-16 Solution-Focused Therapy is a relatively new but strongly supported and growing approach. *Solution-Focused Therapy: Theory, Research, Practice* contains an overview of current research in the area and an account of the use of solution-focused approaches in various relevant therapeutic situations. Written by Dr. Alasdair J. MacDonald, one of the leading

Solution Focused Therapy specialists in Europe and a key figure in the European Brief Therapy Association this book provides both trainees and practitioners with instruction in the method of solution focused brief therapy *Standards and Guidelines for the Psychotherapies* Paul M. Cameron, Jon Ennis, John Deadman, 1998-01-01 A comprehensive overview of the art and science of psychotherapy and a set of practice guidelines for psychiatrist developed from a report by the Joint Task Force on Standards and Guidelines for Medical Psychiatric Psychotherapy of the OPA and OMA *Theory and Practice of Counseling and Psychotherapy* Gerald Corey, 1986 This revision of Gerald Corey's best selling text introduces students to the major theories of counseling psychoanalytic Adlerian existential person centered Gestalt reality behavior cognitive behavior family systems feminist and NEW to this edition postmodern approaches and demonstrates how each theory can be applied to a single case Stan Reviewed by 27 of the field's leading experts Corey's Seventh Edition covers the major concepts of counseling theories shows students how to apply those theories in practice and helps them learn to integrate the theories into an individualized counseling style Incorporating the thinking feeling and behaving dimensions of human experience Corey offers an easy to understand text that helps students compare and contrast the therapeutic models This book is the center of a suite of products that include a revised student manual a revised casebook a companion text and an all new CD ROM

Brief Interventions and Brief Therapies for Substance Abuse Kristen Lawton Barry, 1999 This TIP presents the historical background outcomes research rationale for use and state of the art practical methods and case scenarios for implementation of brief interventions and therapies for a range of problems related to substance abuse This TIP is based on

the body of research conducted on brief interventions and brief therapies for substance abuse as well as on the broad clinical expertise of the Consensus Panel Because many therapists and other practitioners are eclectically trained elements from each of the chapters may be of use to a range of professionals *Introduction to the Profession of Counseling* Frank A. Nugent, 2000 Introducing the field of counseling in a complex multicultural society this text is based on a phenomenological psychosocial life span developmental approach whereby counselors help persons work through situational developmental transitions and conflicts within a multicultural social context Ageism Productive aging Grief Loss Intergenerational issues Needs of caretakers Feminist approaches Life span cognitive development Emotional intelligence Spiritual development Substance abuse clients Joint school community crises prevention and intervention programs Depression Addictions Theories and techniques Practice and process Appropriate as an introduction to counseling *Forms of Brief Therapy* Simon H. Budman, 1983-03-01 With accountability fast becoming the byword of the age psychotherapists are challenged to demonstrate both the therapeutic and cost effectiveness of their interventions While traditionally these two goals have been considered mutually exclusive new research on the briefer therapies appears to show that less can sometimes be more Fewer sessions of a carefully planned focused and well executed short term intervention may contribute more to positive change than protracted analysis *Forms of Brief Therapy* is the first volume to comprehensively and critically address the issue of how the element of time can be used as a therapeutic tool in psychodynamic and behavioral systems and across individual couple family and group interventions The authors put to rest the pervasive myth that there is an ideal specific duration for most therapy Instead they offer a variety of approaches that combine careful examination and integration of presenting problems and patient characteristics At times evaluation may indicate as many as fifty sessions In other cases as evidenced with special force in Bloom's provocative presentation just a single focused session may suffice As Weiss and Jacobson put it in their marital therapy contribution the purpose of this book is to structure therapy that is brief by design rather than by default The contributors to *Forms of Brief Therapy* are among the most renowned practitioners and thinkers in their respective fields Their critical overviews of research and pragmatic analyses of therapy design will prove highly instructive to clinical researchers and teachers who wish to better understand the relationship of therapeutic structure to underlying mechanisms of change Mental health practitioners will find this volume eminently useful in their daily work It provides explicit recommendations for patient selection evaluation and choice of therapeutic techniques which are richly illustrated by case materials Unexcelled as clinical guide and reference *Forms of Brief Therapy* is also ideally suited as a textbook for psychotherapy courses [The Popular Encyclopedia of Christian Counseling](#) Tim Clinton, Ron Hawkins, 2011-09-01 Seasoned counselors and professors Tim Clinton and Ron Hawkins provide a landmark reference that offers a capstone definition of the emerging profession and ministry of the Christian counselor Appropriate for professional counselors lay counselors pastors students and teachers it includes nearly 300 entries by nearly 100 top Christian counselors At approximately 500 pages this

practical guide focuses on functional aspects of Christian counseling and explores such important topics as Christian counseling as a profession ministry and lay ministry Spiritual and theological roots Social emotional and relational issues Skills and essentials in Christian helping Ethical and legal considerations Intake assessment diagnosis and treatment planning Premarital counseling family therapy and substance abuse Counselors will also find up to date information on solution based brief therapy cognitive therapy and biblical truth and trauma and crisis intervention An essential resource for maintaining a broad and up to date perspective on helping others **Journal of Integrative and Eclectic Psychotherapy**, 1989 **Handbook of the Brief Psychotherapies** Richard A. Wells, Vincent J. Giannetti, 2013-11-22 The last two decades have seen unprecedented increases in health care costs and at the same time encouraging progress in psychotherapy research On the one hand accountability cost effectiveness and efficiency have now become commonplace terms for providers of mental health services whereas on the other hand an increasingly voluminous literature has emerged supporting the effectiveness of a number of types of psychotherapies There now exists the possibility for the design and delivery of mental health services that drawing upon this literature more closely approximate empirically established data concerning the appropriateness and effectiveness of psychotherapy The Handbook of the Brief Psychotherapies is intended to capture one major thrust of this movement the development of a group of empirically grounded time limited therapies all sharing a common interest in the clinical utilization of a structured focus and an emphasis on time and action For many years professional self interest competing theoretical paradigms and the vagaries of practice wisdom and clinical myth have influenced the practice of psychotherapy A critical questioning of the resulting predominantly nondirective open ended and global therapies has led to a growing emphasis on action oriented problem focused time limited therapies Yet ironically this interest in the brief psychotherapies has not so much involved a radical departure from traditional therapeutic modalities as it has emphasized a new pragmatism about how time action and structure operate in life as well as in therapy

American Psychiatric Press Textbook of Psychiatry Robert E. Hales, Stuart C. Yudofsky, John A. Talbott, 1994. A clinically oriented comprehensive textbook of psychiatry for use principally by psychiatric residents and practicing psychiatrists but also suitable as a reference for physicians in other specialties and as an introduction to psychiatry for medical students. This edition is 20% larger than the first edition 1988 reflecting the substantial increase in the knowledge base of psychiatry. The multi-authored volume contains 45 chapters grouped into five sections: theoretical foundations, assessment, psychiatric disorders, psychiatric treatments, and special topics. As in the first edition, two appendices are included: the diagnostic criteria from DSM IV and excerpts from the American Psychiatric Glossary, 7th edition. Annotation copyright by Book News Inc, Portland, OR.

Group Counseling for Elementary and Middle School Children Nina W. Brown, 1994-01-30. Focusing on theory and therapeutic factors and applications, this work will provide group leaders and counselors working with children with a conceptual basis and specific strategies for use in therapy, counseling, and therapeutic groups. It proposes that groups be formed around themes of condition such as loss rather than themes of circumstance such as divorce. Forming the group, leader characteristics, and the expression of feelings and emotions are emphasized by the author. This work will be of interest to all mental health professionals working with children: school counselors, social workers, psychologists, and psychiatrists.
