Threshold Concepts And Transformational Learning Educational Futures Rethinking Theory And Practice:

Threshold Concepts and Transformational Learning, 2010-01-01 Over the last decade the notion of threshold concepts has proved influential around the world as a powerful means of exploring and discussing the key points of transformation that students experience in their higher education courses and the troublesome knowledge that these often present Threshold concepts provoke in the learner a state of liminality in which transformation takes place requiring the integration of new understanding and the letting go of previous learning stances Insights gained by learners as they cross thresholds can be exhilarating but might also be unsettling requiring an uncomfortable shift in identity or paradoxically a sense of loss The liminal space can be a suspended state of partial understanding or stuck place in which understanding approximates to a kind of mimicry Threshold Concepts and Transformational Learning substantially increases the empirical evidence for threshold concepts across a large number of disciplinary contexts and from the higher education sectors of many countries This new volume develops further theoretical perspectives and provides fresh pedagogical directions It will be of interest to teachers practitioners and managers in all disciplines as well as to educational researchers **Threshold Concepts in Practice** Ray Land, Jan H. F. Meyer, Michael T. Flanagan, 2016-07-09 Threshold Concepts in Practice brings together fifty researchers from sixteen countries and a wide variety of disciplines to analyse their teaching practice and the learning experiences of their students through the lens of the Threshold Concepts Framework In any discipline there are certain concepts the jewels in the curriculum whose acquisition is akin to passing through a portal Learners enter new conceptual and often affective territory Previously inaccessible ways of thinking or practising come into view without which they cannot progress and which offer a transformed internal view of subject landscape or even world view These conceptual gateways are integrative exposing the previously hidden interrelatedness of ideas and are irreversible However they frequently present troublesome knowledge and are often points at which students become stuck Difficulty in understanding may leave the learner in a liminal state of transition a betwixt and between space of knowing and not knowing where understanding can approximate to a form of mimicry Learners navigating such spaces report a sense of uncertainty ambiguity paradox anxiety even chaos The liminal space may equally be one of awe and wonderment Thresholds research identifies these spaces as key transformational points crucial to the learner's development but where they can oscillate and remain for considerable periods These spaces require not only conceptual but ontological and discursive shifts This volume the fourth in a tetralogy on Threshold Concepts discusses student experiences and the curriculum interventions of their teachers in a range of disciplines and professional practices including medicine law engineering architecture and military education Cover image Detail from Eve offering the apple to Adam in the Garden of Eden and the serpent c 1520 25 Lucas Cranach the Elder 1472 1553 Bridgeman Images All rights reserved [ECRM2014-Proceedings of the 13th European Conference on Research Methodology for Business and Management Studies](#) Dr Martin Rich, Dr Anne Brown, 2014-06-16

Pedagogy of the Clown Sean McCusker, 2023-08-28 This book discusses the tradition of clowning from an educational perspective highlighting the resonant philosophies between the two professions and asking what one can learn from the other Modern day clowning follows an age old tradition with a set of principles and beliefs expounded by proponents of the profession Throughout the principles of clowning themes of subversion inversion play and challenge recur These same ideas have a place in the classroom not as everyday practice but perhaps as a leitmotif The book is therefore a call for educators to consider their position within the learning environment and to embody the clown spirit By looking outside of traditional pedagogical thinking and training this book demonstrates ideas and techniques from which educators can borrow or learn allowing them to enhance their own methods and practices It offers an opportunity to revisit the dynamics of the classroom through the recognition of the important role that the clown can play in society

Frontiers and Advances in Positive Learning in the Age of InformaTiOn (PLATO) Olga Zlatkin-Troitschanskaia, 2020-01-02 Research on students media use outside of education is just slowly taking off Influences of information and communication technologies ICT on human information processing are widely assumed and particularly effects of dis and misinformation are a current threat to democracies Today higher education competes with a very diverse online media landscape and domain specific content from sources of varying quality ranging from high quality videographed lectures by top level university lecturers popular scientific video talks collaborative wikis anonymous forum comments or blog posts to YouTube remixes of discipline factoids and unverified twitter feeds Self organizing learners need more knowledge skills and awareness on how to critically evaluate quality and select trustworthy sources how to process information and what cognitive affective attitudinal behavioral and neurological effects it can have on them in the long term The PLATO program takes on the ambitious goal of uniting strands of research from various disciplines to address these questions through fundamental analyses of human information processing when learning with the Internet This innovative interdisciplinary approach includes elements of ICT innovations and risks learning analytics and large scale computational modelling aimed to provide us with a better understanding of how to effectively and autonomously acquire reliable knowledge in the Information Age how to design ICTs and shape social and human machine interactions for successful learning This volume will be of interest to researchers in the fields of educational sciences educational measurement and applied branches of the involved disciplines including linguistics mathematics media studies sociology of knowledge philosophy of mind business ethics and educational technology

Course Design Strategy Ethan Honary, 2021-07-01 This book is packed with strategies and insights that will help you design better training courses It focuses on how people learn as the key factor in making design decisions The book shows you how to design a good course for any field no matter what medium you use to deliver it Learn how the brain works how people forget how to gain and maintain attention and how to make a subject interesting Then use the easy to follow guidelines to design strategically by increasing curiosity making content emotional making learners practise what they have learned and using failure as a

teaching tool The art of designing a course and making people learn is mastered through practical experience of running courses the science is gained by evidence based research on how people learn The book combines the two offering many examples and studies in cognitive psychology neuroscience instructional design and training the trainer You will find lots of examples and studies in the book that provide insights that may not be obvious but that lead to important design decisions They will change forever how you think about training design and delivery and help you design courses that your learners will love In Course Design Strategy you will learn How to make content memorable What learners expect from a course How people learn and forget and why this should be the cornerstone of any course design How to use eureka moments and eureka concepts as the building blocks of course design How to make content easy to learn Why the presence of a feedback loop is crucial to learning How to use exercises and tests to enhance learning *Student Mental Health and Wellbeing in Higher Education* Nicola Barden,Ruth Caleb,2019-08-26 Good mental health is essential for students to manage the challenges that university life presents This book offers pragmatic guidance to support academic and student services staff in engaging with this critical issue both in terms of being proactive within their role to promote a positive approach to wellbeing and understanding how to care appropriately for students who may not be flourishing in the university environment Key topics include The pressure points and transitions of student life The crucial role of departmental and academic staff How to make mental health policies work The legal obligations and limits of student support Creating the conditions for confident support

Trans-Generational Family Relations Isabelle Albert,Emily Abbey,Jaan Valsiner,2018-02-01 The present volume deals with the experience of ambivalence in family relations a well known phenomenon that has inspired more and more research and theorizing in the last years but that is however sometimes difficult to capture Bringing together junior and senior researchers from different parts of the world ideas on theory and research are elaborated following qualitative and quantitative approaches This book thus contributes to theory building as well as outlining research results and helping to develop measurement in interpersonal and intergenerational relations
