The People Vs Tech Jamie Bartlett, 2018-04-05 From the bestselling author of *The Dark Net* comes a book that explains all the dangers of the digital revolution and offers concrete solutions on how we can protect our personal privacy and democracy itself The internet was meant to set us free But have we unwittingly handed too much away to shadowy powers behind a wall of code all manipulated by a handful of Silicon Valley utopians ad men and venture capitalists And in light of recent data breach scandals around companies like Facebook and Cambridge Analytica what does that mean for democracy our delicately balanced system of government that was created long before big data total information and artificial intelligence In this urgent polemic Jamie Bartlett argues that through our unquestioning embrace of big tech the building blocks of democracy are slowly being removed The middle class is being eroded sovereign authority and civil society is weakened and we citizens are losing our critical faculties maybe even our free will *The People Vs Tech* is an enthralling account of how our fragile political system is being threatened by the digital revolution Bartlett explains that by upholding six key pillars of democracy we can save it before it is too late We need to become active citizens uphold a shared democratic culture protect free elections promote equality safeguard competitive and civic freedoms and trust in a sovereign authority This essential book shows that the stakes couldn't be higher and that unless we radically alter our course democracy will join feudalism supreme monarchies and communism as just another political experiment that quietly disappeared

Stakeholder Capitalism A Global Economy that Works for Progress People and Planet argues convincingly that if we don't start with recognizing the true shape of our problems our current system will continue to fail us To help us see our challenges more clearly Schwab the Founder and Executive Chairman of the World Economic Forum looks for the real causes

of our system's shortcomings and for solutions in best practices from around the world in places as diverse as China Denmark Ethiopia Germany Indonesia New Zealand and Singapore And in doing so Schwab finds emerging examples of new ways of doing things that provide grounds for hope including Individual agency how countries and policies can make a difference against large external forces A clearly defined social contract agreement on shared values and goals allows government business and individuals to produce the most optimal outcomes Planning for future generations short sighted presentism harms our shared future and that of those yet to be born Better measures of economic success move beyond a myopic focus on GDP to more complete human scaled measures of societal flourishing By accurately describing our real situation Stakeholder Capitalism is able to pinpoint achievable ways to deal with our problems Chapter by chapter Professor Schwab shows us that there are ways for everyone at all levels of society to reshape the broken pieces of the global economy and country by country company by company and citizen by citizen glue them back together in a way that benefits us all

Tickling Sharks John Elkington, 2024-04-09 Speaking Tomorrow's Truth to Power Sustainability is going mainstream but where did the story start For decades the traditional capitalist business model required growth at all costs Business as usual guaranteed unsustainability Now in contrast we see growing adoption of greener practices but where did these ideas come from and where are the linked movements headed Drawing on a half century of experience since the early seventies Godfather of Sustainability John Elkington explains how a series of societal pressure waves have helped to transform business markets and ultimately capitalism He explains how he came to tickle the human sharks of the corporate world encouraging them to embrace once unthinkable ways of addressing new social economic environmental and governance priorities John's candid memoir tracks his colorful journey through youthful misadventures and inspirations to his pioneering work making business sense of sustainability Written in a knowledgeable thoughtful and humorous voice this witness statement explains and criticizes progress to date before sketching a manifesto for those determined to make the global economy more responsible more resilient and crucially more regenerative
