Environment-Animal-Human Web: A "One Health" View of Toxicological Risk Analysis Chiara Frazzoli, Alberto Mantovani, 2019-04-09 One Health OH is the conceptual and operational framework that links environment food producing organisms and human health OH is a developing field that deals with the multifaceted web of feed backs and interactions among its components In order to avoid drowning into complexity priority issues should be identified either for research and for risk analysis To date OH approaches have frequently pivoted on infectious agents shared among animals and humans and

the related problems such as antibiotic resistance Nevertheless the OH scenarios include and should increasingly include environment and health problems Food and environment do interact Environment influences the living organisms that produce human food and in the meanwhile food production outputs influence the environmental quality as for foods of animal origin feed materials and practices are driving components of the environment food interactions In this book we aimed at highlighting the importance of environment chemical exposures and toxicological issues in the field of OH as well as the need for multidisciplinary integration in order to support OH approaches into diseases prevention and health promotion The Genus Rhipicephalus (Acari, Ixodidae) Jane B. Walker, James E. Keirans, Ivan G. Horak, 2005-09-15 Ticks in the genus Rhipicephalus include many important vectors of animal and human pathogens but many species are notoriously difficult to identify particularly as immature stages This reference volume provides identification keys for adult ticks from the Afrotropical regions and elsewhere For the nymphs and larvae unique plates have been compiled in which line drawings of the capitula of similar species are grouped together to facilitate identification Brief well illustrated descriptions of the known stages of every species are given plus information on their hosts distribution and disease relationships Tables providing data on host parasite relationships and disease transmission are also included making this the definitive reference source on this group for all those interested in acarology veterinary or medical parasitology and entomology for many years to come
