Timaeus And Critias Oxford Worlds Classics:

Timaeus and Critias Plato,2008-11-13 In Timaeus Plato attempts to describe and explain the structure of the universe the creator god the elements the lower gods the stars and men The companion piece Critias is the origin of the story of Atlantis the lost empire defeated by ancient Athenians This is the clearest translation yet of these crucial ancient texts

The Unbound God Chris L. de Wet,2017-07-14 This volume examines the prevalence function and socio political effects of slavery discourse in the major theological formulations of the late third to early fifth centuries AD arguably the most formative period of early Christian doctrine The question the book poses is this in what way did the Christian theologians of the third fourth and early fifth centuries appropriate the discourse of slavery in their theological formulations and what could the effect of this appropriation have been for actual physical slaves This fascinating study is crucial reading for anyone with an interest in early Christianity or Late Antiquity and slavery more generally

Golden Thread Amy Dyer,2019-12-09 In The Golden Thread there are 14 unique tales from Raven the Lightbringer to Odin and The Lindworm Prince to The Sun Maiden Each chapter braids the visible with the invisible a diverse tapestry of folklore symbolism alchemy psychology and shamanism The Golden Thread traverses the landscape of imagination and the borderlands of our own lives those threshold moments of love and loss It aims to show us in a time of great upheaval how cosmic seasonal and ancestral patterns can help root and connect us While myth a vital and steadfast

guide weaves its way throughout **Reconsidering Creation Ex Nihilo in Genesis 1** Nathan J. Chambers, 2020-11-15
There is a broad consensus among biblical scholars that creation ex nihilo from nothing is a late Hellenistic concept with little inherent connection to Genesis 1 and other biblical creation texts In this book Nathan J Chambers forces us to reconsider the question arguing in favor of reading this chapter of the Bible in terms of ex nihilo creation and demonstrating that there is a sound basis for the early Christian development of the doctrine Drawing on the theology of Augustine of Hippo and Thomas Aquinas Chambers considers what the ex nihilo doctrine means and does in classical Christian dogma He examines ancient Near Eastern cosmological texts that provide a potential context for reading Genesis 1 Recognizing the distance between the possible historical and theological frameworks for interpreting the text he illuminates how this doctrine developed within early Christian thought as a consequence of the church's commitment to reading Genesis 1 as part of Christian Scripture Through original close readings of the chapter that engage critically with the work of Jon Levenson Hermann Gunkel and Brevard Childs Chambers demonstrates that far from precluding interpretive possibilities reading Genesis 1 in terms of creation from nothing opens up a variety of interpretive avenues that have largely been overlooked in contemporary biblical scholarship Timely and innovative this book makes the case for a new or recovered framework for reading Genesis 1 that will appeal to biblical studies scholars and seminarians Suffering and Glory Patrick

Whitworth, 2018-09-01 The story of the growth of the early Christian community A rapid detailed and accurate narrative full of picturesque scenes drawn directly from contemporary witnesses to the rise of Christianity in the Roman world

Ontohackers: Radical Movement Philosophy in the Age of Extinctions and Algorithms, Part II Jaym*/Jaime del Val, 2025-05-27 Ontohackers redefines what movement worlds and bodies are through the sense of proprioception reconceptualized as formless fluctuation field a movement matrix that is itself also thought and which underlies all life forms and fields including the inorganic Our worlds are made of endless such entangled fields n folding in neverending variation or enframement The current planetary crisis has emerged due to an accidental evolutionary alignment narrowing and impoverishment of that matrix's indeterminacy that appeared gradually and eventually with bipedalism and which created an imbalance between the larger proprioceptive field and its brain and made the atrophied body extend itself technically in geometric fields gradually covering the planet along with its fears with disastrous consequences that are unleashing an unprecedented type of mass extinction and species suicide The reply to this crisis which is urgently due if we are to reduce even slightly the collapse coming up over the next decades is in recovering a lost sensorimotor plasticity which is also cognitive affective and relational plasticity through developing movement techniques for cultivating Body Intelligence BI reversing and taking elsewhere the failed evolution culminating in AI stepping down from humanist supremacist pedestals undoing our dependency upon unsustainable killing machines of sedentary consumerism that impoverish experience stopping the reproduction of a species that has become plague by reversing heteronormative reproductive dogmas till we reach

preagricultural population levels and recovering the joys of moving with the world in symbiotic mutation towards unprecedented evolutionary variations this is our cosmic responsibility for all life on Earth The book's structure expresses Enfranchisement Theory with regard to how processes of becoming have a triple movement an incipience unfolding the field Part I a condensation expansion where the field acquires full consistency Part II and a resonance or memory of the field relating to other fields Part III Part II subtitled Revolution Technologies includes Books 4 5 and 6 and is by far the longest volume elaborating in depth the book's proposals in a triple movement It first exposes the technologies of variation in nature Book 4 followed by the technologies of reduction in the Algoricene Book 5 and finally the possibilities for overcoming the reductive fold Book 6 Book 4 proposes a swarming chaomology as theory of orgiastic evolution culminating in the concept of metabiosis life as indeterminate symbiotic mutation Book 5 diagnoses the regimes that have formatted movement and presents the theory of the Algoricene or Age of Extinctions and Algorithms It exposes a kinetic ontology genealogy and dynamics of power An interlude discusses post trans and metahumanism and a second part of the book unfolds a radical critique of the Planetary Holocaust Book 6 unfolds metaformance aesthetics and metahuman politics including the theory of metaformativity the ontotacking pragmatics and a choral Dionysian ontology where the author also discusses at length his own techniques and art projects involving a radical challenge to human supremacism to face the extinction challenge now threatening all life on Earth toward an Earth liberation and regeneration **Atlantis** Carlo Piano, Renzo Piano, 2020-11-03 The renowned architect and his son sail from Genoa in search of Atlantis in this intimate and insightful chronicle of exploration and revelation Kirkus Reviews starred review Renowned architect Renzo Piano whose credits include the New Whitney Museum the Pompidou Center the New York Times Building and others and his son Carlo a well regarded journalist set sail from Genoa one late summer day They went looking for the lost city of Atlantis which according to legend was built to harbor a perfect society They sail across the Pacific along the banks of the Thames and the Seine reaching as far as Athens San Francisco's Golden Gate Park and Osaka Bay Embarking not only on a life changing journey but also on series of conversations that are humorous irreverent erudite and always entertaining Renzo and Carlo seek out the perfect city Along the way they reflect on their own relationship on fathers and sons on the idea of travel itself and perhaps most notably on architecture space and the secret life of forms *Spatialities of Speculative Fiction* Gwilym Lucas Eades, 2023-11-09 This book examines science fiction fantasy and horror novels utilizing a conceptual toolkit of the ten duties of speculative fiction Building on previous work in the discipline of geography it will demonstrate the value of speculation in the visualisation of Anthropocene futures The book presents insights into how novels produce specifically geographical knowledge about the world spatialities and how they use both literal maps and figurative counter mappings to comment upon and shape futures This book is about much more than science fiction It covers areas of literature and para literature associated with the fantastic and as such looks also at works of fantasy and horror The areas of overlap between these three categories of

fantastic literature are posited as the most productive in the terms by which this book navigates namely spatiality The book will explore through the critical examination of a selection of key works of speculative fiction how science fictional and fantastic narratives are spatialized through both conceptual and literal mappings This book is intended for both an academic and practitioner and for people interested in both producing scholarly commentary upon works of speculative fiction and for those writing speculative fiction and novels

An Architecture of Place Randall S. Lindstrom, 2024-06-25 Challenging mainstream architecture's understandings of place this book offers an illuminating clarification that allows the idea's centrality in all aspects of everyday design thinking to be rediscovered or considered for the first time Rigorous but not dense practical but not trivialising the book unfolds on three fronts First it clearly frames the pertinent aspects of topology the philosophy of place importantly differentiating two concepts that architecture regularly conflates place and space Second it rejects the ubiquitous notion that architecture makes place and instead reasons that place is what makes architecture and the built environment possible that place calls for and to architecture and that architecture is thus invited to listen and respond Finally it turns to the matter of designing responses that result not just in more places of architecture demanding little of design nor merely in architecture with some sense of place demanding little more but rising above those responses that constitute an architecture of place demanding the greatest vigilance but offering the utmost freedom Opening up a term regarded as so common that its meaning is seldom considered the author reveals the actual depth and richness of place its innateness to architecture and its essentiality to practitioners clients educators and students including those in all spatial disciplines
