China's Education Aid to Africa Wei Ye, 2023-05-31 China's rise as an aid provider in Africa has caught global attention with China's activity being viewed as the projection of soft power of a neo colonialist kind in an international relations context This book which focuses on China's education aid government

scholarships training Confucius Institutes dispatched teachers etc reveals a much more complicated picture It outlines how the divide between the Chinese Ministry of Commerce and the Ministry of Education hinders China's soft power projection how much of China's aid is bound up with an education for economic growth outlook mirroring China's own recent experiences of economic development and how China's aid prioritized to reflect the commercial sector's interests is out of step with most international development aid which is dominated by education agendas and the campaigns of international organizations and traditional donors this leaves China easily exposed to the charge of neo colonialism This situation also reveals insufficient knowledge production of China and in South South Cooperation Substantial production of Southern knowledge should recognize the international development cooperation architecture as an open system by which both traditional donors and Southern countries transform

Labour and Living Standards in Pre-Colonial West Africa Klas Rönnbäck, 2015-11-19 Sub Saharan Africa is the poorest region in the world But its current status has skewed our understanding of the economy before colonization Rönnbäck reconstructs the living standards of the population at a time when the Atlantic slave trade brought money and men into the area enriching our understanding of West African economic development

African Perspectives on Culture and World Christianity Joseph Ogbonnaya, 2017-05-11 Unlike the global North the ferment of Christianity in the global South among the majority of world people has been astronomical Despite the shift in the center of gravity of Christianity to the global South intra ecclesial tensions globally remain those of the relationship of culture to religion The questions posed revolve around to what extent Western Christianity should be adapted to local cultures Should we talk of Christianity in non Western contexts or of majority world Christianity Is it appropriate to describe the shift as the emergence of global Christianity or world Christianity Should Christianity in the global South mimic Christianity in the global North or can it be different in the light of the diversity of these cultures Can Africans Asians Latin Americans Europeans and North Americans the entire global community speak of God in the same way This book is devoted to examining varieties of the intercultural process in world Christianity It understands culture broadly as a common meaning upon which communities social order is organized Culture in this sense is the whole life of people It is the integrator of the filial bond holding people together and the various institutional structures economic technological political and legal that guarantee peace and survival in societies states and nations both locally and internationally As this book shows the centrality of culture for world Christianity equally showcases the important position the scale of values occupies in world Christianity

Nigeria in the Fourth Republic E. Ike Udogu, 2022-04-14 Nigeria is a bellwether in an enormous continent endowed with natural resources and human capital whose development and greatness have been marred by political instability since gaining home rule from Britain in 1960 The contemporary political economic and social quandaries that have stultified Nigeria's growth project flows from difficulties in cultivating patriotic leaders with pluck to enact efficacious policies that will catapult the country to greater heights developmentally Nigeria in the Fourth Republic

Confronting the Contemporary Political Economic and Social Dilemmas edited by E Ike Udogu examines some of the vital issues responsible for the current political malaise and recommends strategies for exculpating the country from her current political quagmires. The contributors to this book argue inter alia for the avoidance of false starts reminiscent of the military interventions that aborted the democracy project and advocates the enactment of effective policies to supersede decision dictated by politics. This volume proposes national healthcare strategies to address the country's healthcare needs and for dialogue to extinguish combustible inter religious conflicts. The book recommends ways to assuage police highway malfeasance and explains why human rights observance is critical to further national cohesion while creating space for the subalterns to have their voices heard in discourses on how to advance peaceful coexistence.

Political Economy Barry Clark, 2016-03-21. This nontechnical book provides a comprehensive and interdisciplinary survey of political economy that can easily be understood by any reader with an introductory level background in economics. As 21st century political debate becomes polarized across ideological lines, students and citizens need to understand the underlying values on which contending arguments are based. The current political gridlock calls for a deeper appreciation of the competing perspectives in political economy. Now revamped for a third edition, *Political Economy: A Comparative Approach* supplies a truly interdisciplinary examination of the development and evolution of political economy from the Enlightenment onward, drawing material from the realms of political theory, sociology, philosophy, and history, as well as from economics, to present detailed comparisons of competing perspectives on a variety of current issues. The book begins with an introduction to political economy that provides readers with an overview of the historical development of the discipline, followed by in-depth analyses of four ideological perspectives in political economy: Classical Liberalism, Radicalism, Conservatism, and Modern Liberalism. The author then applies each of the four ideological perspectives to a range of contemporary issues such as the role of government, economic instability, poverty, labor relations, discrimination, education, culture, the environment, and international trade. Readers will gain insight into the methods and practice of political economics as well as better understand the history of political economic thought and the effects of historical processes. European industrialization, for example, on modern debates.

The International Law on Foreign Investment M. Sornarajah, 2021-07-01. The climate surrounding foreign investment law is one of controversy and change, and with implications for human rights and environmental protection, foreign investment law has gained widespread public attention and visibility. This fully updated edition of Sornarajah's classic text offers thought-provoking analysis of the law in historical, political, and economic contexts, capturing leading trends and charting the possible course of future developments. It takes into account the newer types of treaties that establish a regulatory space for states and moves away from inflexible investment protection, exploring the newly created defences relating to environment, human rights, indigenous rights, and other areas, ending the fragmentation of the law. It looks at the current debates on legitimacy of the system and current efforts at reform. Suitable for postgraduate and undergraduate
