Timothy Or Notes Of An Abject Reptile:

Timothy Verlyn Klinkenborg, 2006 Timothy a tortoise who lived in the garden of eighteenth century curate Gilbert White speaks out on his life in the garden his nine day adventure outside the gate his observations of the curious habits and habitations of humans and the natural world around him 30 000 first printing *Timothy; Or, Notes of an Abject Reptile* Verlyn Klinkenborg, 2007-01-09 Few writers have attempted to explore the natural history of a particular animal by adopting the animal s own sensibility But Verlyn Klinkenborg has done just that in Timothy an insightful and utterly engaging story of the world s most famous tortoise whose real life was observed by the eighteenth century English curate and naturalist Gilbert White For thirteen years Timothy lived in White s garden Here Klinkenborg gives the tortoise an unforgettable voice and keen powers of observation on both human and natural affairs Wry and wise unexpectedly moving and enchanting at every careful turn Timothy surprises and delights

How Animals Grieve Barbara J. King, 2013-03-28 A touching and provocative exploration of the latest research on animal minds and animal emotions from the renowned anthropologist and author The Washington Post Scientists have long cautioned against anthropomorphizing animals arguing that it limits our ability to truly comprehend the lives of other creatures Recently however things have begun to shift in the other direction and anthropologist Barbara J King is at the forefront of that movement arguing strenuously that we can and should attend to animal emotions With How Animals Grieve she draws our attention to the specific case of grief and relates story after story from fieldsites farms homes and more of animals mourning lost companions mates or friends King tells of elephants surrounding their matriarch as she weakens and dies and in the following days attending to her corpse as if holding a vigil A housecat loses her sister from whom she s never before been parted and spends weeks pacing the apartment wailing plaintively A baboon loses her daughter to a predator and sinks into grief In each case King uses her anthropological training to interpret and try to explain what we see to help us understand this animal grief properly as something neither the same as nor wholly different from the human experience of loss The resulting book is both daring and down to earth strikingly ambitious even as it s careful to acknowledge the limits of our understanding Through the moving stories she chronicles and analyzes so beautifully King brings us closer to the animals with whom we share a planet and helps us see our own experiences attachments and emotions as part of a larger web of life death love and loss

Infowhelm Heather Houser, 2020-06-16 How do artists and writers engage with environmental knowledge in the face of overwhelming information about catastrophe What kinds of knowledge do the arts produce when addressing climate change extinction and other environmental emergencies What happens to scientific data when it becomes art In Infowhelm Heather Houser explores the ways contemporary art manages environmental

knowledge in an age of climate crisis and information overload Houser argues that the infowhelm a state of abundant yet contested scientific information is an unexpectedly resonant resource for environmental artists seeking to go beyond communicating stories about crises Infowhelm analyzes how artists transform the techniques of the sciences into aesthetic material repurposing data on everything from butterfly migration to oil spills and experimenting with data collection classification and remote sensing Houser traces how artists ranging from novelist Barbara Kingsolver to digital memorialist Maya Lin rework knowledge traditions native to the sciences entangling data with embodiment quantification with speculation precision with ambiguity and observation with feeling Their works provide new ways of understanding environmental change while also questioning traditional distinctions between types of knowledge Bridging the environmental humanities digital media studies and science and technology studies this timely book reveals the importance of artistic medium and form to understanding environmental issues and challenges our assumptions about how people arrive at and respond to environmental knowledge

The Animal Part Mark Payne, 2010-10-15 How can literary imagination help us engage with the lives of other animals The question represents one of the liveliest areas of inquiry in the humanities and Mark Payne seeks to answer it by exploring the relationship between human beings and other animals in writings from antiquity to the present Ranging from ancient Greek poets to modernists like Ezra Pound and William Carlos Williams Payne considers how writers have used verse to communicate the experience of animal suffering created analogies between human and animal societies and imagined the kind of knowledge that would be possible if human beings could see themselves as animals see them The Animal Part also makes substantial contributions to the emerging discourse of the posthumanities Payne offers detailed accounts of the tenuousness of the idea of the human in ancient literature and philosophy and then goes on to argue that close reading must remain a central practice of literary study if posthumanism is to articulate its own prehistory For it is only through fine grained literary interpretation that we can recover the poetic thinking about animals that has always existed alongside philosophical constructions of the human In sum The Animal Part marks a breakthrough in animal studies and offers a significant contribution to comparative poetics

We All Feel Barbara J. King, 2013-12-13 From the time of our earliest childhood encounters with animals we casually ascribe familiar emotions to them though scientists have long cautioned against such anthropomorphizing Recently however things have begun to shift in the other direction and anthropologist Barbara J King is at the forefront of that movement arguing strenuously that we can and should attend to animal emotions In the stories she tells here King relays how some farm animals horses goats chickens and ducks bond with others and engage in mourning when their friends die Here too dolphins and whales exhibit striking signs of suffering over the loss of babies and companions a mother dolphin will not give up her dead baby and whales risk stranding themselves in small groups rather than abandon kin As part of a larger web of life death love and loss King calls our attention to emotions both our own and those of our companion species

Animal Companions Ingrid H. Tague, 2015-06-17 Animal Companions

explores how eighteenth century British society perceived pets and the ways in which conversation about them reflected and shaped broader cultural debates While Europeans kept pets long before the eighteenth century many believed that doing so was at best frivolous and at worst downright dangerous Ingrid Tague argues that for Britons of the eighteenth century pets offered a unique way to articulate what it meant to be human and what society ought to look like With the dawn of the Enlightenment and the end of the Malthusian cycle of dearth and famine that marked previous eras England became the wealthiest nation in Europe with a new understanding of religion science and non European cultures and unprecedented access to consumer goods of all kinds These transformations generated excitement and anxiety that were reflected in debates over the rights and wrongs of human animal relationships Drawing on a broad array of sources including natural histories periodicals visual and material culture and the testimony of pet owners themselves *Animal Companions* shows how pets became both increasingly visible indicators of spreading prosperity and catalysts for debates about the morality of the radically different society emerging in eighteenth century Britain

Writing Animals Timothy C. Baker, 2019-01-07 This book surveys a broad range of contemporary texts to show how representations of human animal relations challenge the anthropocentric nature of fiction By looking at the relation between language and suffering in twenty first century fiction and drawing on a wide range of theoretical approaches Baker suggests new opportunities for exploring the centrality of nonhuman animals in recent fiction writing animal lives leads to new narrative structures and forms of expression These novels destabilise assumptions about the nature of pain and vulnerability the burden of literary inheritance the challenge of writing the Anthropocene and the relation between text and image Including both well known authors and emerging talents from J M Coetzee and Karen Joy Fowler to Sarah Hall Alexis Wright and Max Porter and texts from experimental fiction to work for children *Writing Animals* offers an original perspective on both contemporary fiction and the field of literary animal studies
