## Description

The **BL70B** machine is a four-wheel drive rigid backhoe loader.

The engine is a low-emission, direct-injection, turbocharged, 4 cylinders, four-stroke, 4.8l displacement, liquid-cooled Volvo diesel engine. The engine is conforming EPA Tier 3 and Stage IIIA regulations.

The machine has a mechanical Powershuttle transmission with four forward and four reverse fully synchronized gears. The transmission has a single stage hydraulic torque converter.

The machine can be equipped with an optional automatic Powershift transmission with four forward and reverse speeds. The Powershift transmission features electro-hydraulic forward/reverse lever on steering column or switch on loader pilot control. Automatic mode is activated when fourth gear is engaged.

The front and rear axles have fully floating drive shafts with planetary type reductions. The rear axle has a dog-clutch type differential lock and integral oil immersed multi-disc brakes.

The service brake is a hydraulically operated, multi-plate, oil-immersed, servo power-assisted brake with self adjusting inboard disc brakes.

The parking brake is mechanically operated.

The steering system is hydrostatic with a load-sensing steering unit and a double acting steering cylinder.

The machine is equipped with a redesigned cab. The new cab has an improved all around visibility and ergonomic layout. An optional canopy is available.

The electrical system voltage is 12 VDC. Electrical and electro-hydraulic functions are monitored and controlled by a Vehicle Electronic Control Unit (V-ECU).

On the side console several machine functions can be controlled and monitored in a display. For electrical troubleshooting a special service mode can be activated in the display.

The hydraulic system has one working pump with variable displacement. The pump is a closed centre variable piston pump. For the backhoe functions optional pilot controls are available.
