Worlds Difference Rethinking Education Century Ebook:

EBOOK: Rethinking Learning in Early Childhood Education Nicola Yelland, Libby Lee, Maureen O'Rourke, Cathie Harrison, 2008-08-16 I think a real strength of the book is the use of the case studies to ground the points made and to offer in depth insights into practice Jackie Marsh University of Sheffield UK This exciting book considers the nature of young children's lives and how this can and should inform early childhood education in practical ways It examines What is it like for young children to learn in the 21st century How can we link this to new and innovative ways of providing relevant and engaging learning contexts for young children What it means to be multiliterate in the 21st century The book explores how learning and engagement with ideas can be extended through the use of new technologies describing how information and communications technologies enable young people to extend the boundaries of their learning and social interactions These experiences have important implications for formal learning environments and the nature of the curriculum including bold new approaches to teaching and learning which offer opportunities for children to investigate in new ways This book provides examples of the ways in which early childhood teachers have extended opportunities for new types of learning for children by creating contexts in which they are able to explore and represent their ideas and thinking in multimodal formats using new technologies This book represents a research based discussion for rethinking learning in the 21st century and includes various case studies and scenarios to enable students and practising teachers to try out new ideas Finally it considers new ways of thinking about children's learning by creating a multiliteracies portrait pedagogies and pathways profile that enables teachers to build on their strengths to plan for effective learning outcomes Rethinking Learning in Early Childhood Education is key reading for students on Early Years courses or Primary Education pre service teacher education programmes

EBOOK: Rethinking Single Sex Teaching Gabrielle Ivinson, Patricia Murphy, 2007-11-16 The retreat to single sex classes in co educational comprehensive schools in the UK reflects a long history where educational policy and practice has made explicit the belief that boys and girls are different in how they learn and what they should learn However there is also a common assumption that there is equality in what is made available to learn and if there is not then single sex organisation achieves this The authors challenge this opinion and offer a fresh and theoretically informed look at the debate about single sex teaching presenting insights from research about the intended and unintended consequences of gender division in schools Drawing on classroom observations and in depth interviews with teachers and students the book illustrates the effect of single sex classrooms on learners and on the versions of subject knowledge made available to them In exploring the differences in teaching practices between boys and girls classrooms in relation to subjects such as Science English Drama and Design and Technology the authors highlight how single sex teaching can inadvertently create circumstances which limit rather than open up students access to subject knowledge The authors offer conceptual tools for investigating the knowledge gender dynamic advocating that learning will expand if teachers work with gender to help

students to cross boundaries into non traditional gender territories within subject lessons Rethinking Single Sex Teaching is thought provoking reading for teachers head teachers academics and policy makers

EBOOK: Gender and the Changing Face of Higher Education: A Feminized Future? Carole Leathwood, Barbara Read, 2008-12-16 A notable feature of higher education in many countries over the last few decades has been the dramatic rise in the proportion of female students Women now outnumber men as undergraduate students in the majority of OECD countries fuelling concerns that men are deserting degree level study as women overtake them both numerically and in terms of levels of achievement The assertion is that higher education is becoming increasingly feminized reflecting similar claims in relation to schooling and the labour market At the same time there are persistent concerns about degree standards with allegations of dumbing down This raises questions about whether the higher education system to which more women have gained access is now of less value both intrinsically and in terms of labour market outcomes than previously This ground breaking book examines these issues in relation to higher education in the UK and globally It provides a thorough analysis of debates about feminization asking To what extent do patterns of participation continue to reflect and re construct wider social inequalities of gender social class and ethnicity How far has a numerical increase in women students challenged the cultures curriculum and practices of the university What are the implications for women men and the future of higher education Drawing on international and national data theory and research Gender and the Changing Face of Higher Education provides an accessible but nuanced discussion of the feminization of higher education for postgraduates policy makers and academics working in the field
