The Chinese Written Character as a Medium for Poetry Ernest Fenollosa, Ezra Pound, Jonathan Stalling, Lucas Klein, 2009-08-25 First published in 1919 by Ezra Pound Ernest Fenollosa's essay on the Chinese written language has become one of the most often quoted statements in the history of American poetics As edited by Pound it presents a powerful conception of language that continues to shape our poetic and stylistic preferences the idea that poems consist primarily of images the idea that the sentence form with active verb mirrors relations of natural force But previous editions of the essay represent Pound's understanding it is fair to say his appropriation of the text Fenollosa's manuscripts in the Beinecke Library of Yale University allow us to see this essay in a different light as a document of early sustained cultural interchange between North America and East Asia Pound's editing of the essay obscured two important features here restored to view Fenollosa's encounter with Tendai Buddhism and Buddhist ontology and his concern with the dimension of sound in Chinese poetry This book is the definitive critical edition of Fenollosa's important work After a substantial Introduction the text as edited by Pound is presented together with his notes and plates At the heart of the edition is the first full publication of the essay as Fenollosa wrote it accompanied by the many diagrams characters and notes Fenollosa and Pound scrawled on the verso pages Pound's deletions insertions and alterations to Fenollosa's sometimes ornate prose are meticulously captured enabling readers to follow the quasi dialogue between Fenollosa and his posthumous editor Earlier drafts and related talks reveal the development of Fenollosa's ideas about culture poetry and translation Copious multilingual annotation is an important feature of the edition This masterfully edited book will be an essential resource for scholars and poets and a starting point for a renewed discussion of the multiple sources of American modernist poetry

The Pharmacology of Chinese Herbs, Second Edition Kee C. Huang, 1998-07-27. Records cataloging the healing powers of natural substances, plants, minerals, and animal byproducts date back more than 4,000 years. There is no denying the effectiveness of traditional Chinese medicine, yet until recently the roots of this knowledge were largely lost in superstition and folklore. However, the use of herbs as an alternative medical treatment for many illnesses has increased steadily over the last decade, particularly since such herbs are categorized as Natural Food Products and are not yet subject to strict control by the FDA. Reports published in 1996 indicate that more than 10% of the US population has used herbal remedies. This book does not debate the value of Eastern or Western medicine but brings together Chinese herbal lore and Western scientific methods in a current, comprehensive treatise on the pharmacology of Chinese herbs. This second edition of *The Pharmacology of Chinese Herbs* presents the chemical composition, pharmacological action, toxicity, and therapeutic value of 473 herbs. The book classifies herbs according to their therapeutic value, informs how active ingredients in herbs may adversely interact with other herbs or drugs, evaluates which herbs have the potential for more investigation and possible use as drugs, describes the pharmacological action of each herb based on recent scientific study, and describes each herb according to Chinese pharmacopoeia and folk medicine. Provides a review of Chinese medical history, presents information on how to use modern chemical techniques for enhancing or modifying herbal ingredients into better agents with more strength and activity. What's New in the Second Edition: Discussions on Herbs and their specific effects on the immune system, Herbs and fertility, infertility, Anti-cancer herbs, Anti-HIV herbs, Anti-malarial herbs, Ginseng and ginsenosides, Anti-Alzheimer herbs, Herbs affecting the nervous system.
