Prime Time Marc Freedman,2008-08-04 Over the next three decades the number of Americans over fifty will double swelling to more than a quarter of the population Already we are living thirty years longer than a century ago with further gains expected in the coming years The end result is a new stage of life one as long or longer than childhood or middle age in duration and one spent in unprecedented good health Yet as individuals and as a society we've shown little imagination or wisdom in using this great gift of a third age Marc Freedman identifies the new longevity as not a problem to be solved but an opportunity to be seized provided we can engage the experience talent and idealism of older Americans At a juncture when the middle generation faces a time famine struggling to simultaneously raise kids and work long hours on the job the older generation is awash in free time poised to succeed women as the trustees of civic life in this country In the process they stand to find new meaning and purpose in their lives and abandon the limbo like state unfulfilling for so many older individuals Freedman argues that the aging phenomenon the massive transformation that many portray as our downfall may in fact be our best hope for renewal as a nation

Crisis in the Red Zone Richard Preston, 2020-04-03 NEW YORK TIMES BESTSELLER An urgent wake up call about the future of emerging viruses and a gripping account of the doctors and scientists fighting to protect us told through the story of the deadly 2013-2014 Ebola epidemic *Crisis in the Red Zone* reads like a thriller That the story it tells is all true makes it all more terrifying Elizabeth Kolbert Pulitzer Prize winning author of *The Sixth Extinction* From the #1 bestselling author of *The Hot Zone* now a National Geographic original miniseries This time Ebola started with a two year old child who likely had contact with a wild creature and whose entire family quickly fell ill and died The ensuing global drama activated health professionals in North America Europe and Africa in a desperate race against time to contain the viral wildfire By the end as the virus mutated into its deadliest form and spread farther and faster than ever before 30 000 people would be infected and the dead would be spread across eight countries on three continents In this taut and suspenseful medical drama Richard Preston deeply chronicles the pandemic in which we saw for the first time the specter of Ebola jumping continents crossing the Atlantic and infecting people in America Rich in characters and conflict physical emotional and ethical *Crisis in the Red Zone* is an immersion in one of the great public health calamities of our time Preston writes of doctors and nurses in the field putting their own lives on the line of government bureaucrats and NGO administrators moving often fitfully to try to contain the outbreak and of pharmaceutical companies racing to develop drugs to combat the virus He also explores the charged ethical dilemma over who should and did receive the rare doses of an experimental treatment when they became available at the peak of the disaster *Crisis in the Red Zone* makes clear that the outbreak of 2013-2014 is a harbinger of further more severe outbreaks and of emerging viruses heretofore unimagined in any country on any continent In our ever more interconnected world with roads and towns cut deep into the jungles of equatorial Africa viruses both familiar and undiscovered are being unleashed into more densely populated areas than ever before The more we discover about the virosphere the more we realize its deadly potential *Crisis in the Red Zone* is an exquisitely timely book a stark warning of viral outbreaks to come

Epidemics Samuel K. Cohn Jr., 2018-03-09 By investigating thousands of descriptions of epidemics reaching back before the fifth century BCE Plague of Athens to the distrust and violence that erupted with Ebola in 2014 *Epidemics* challenges a dominant hypothesis in the study of epidemics that invariably across time and space epidemics provoked hatred blaming of the other and victimizing bearers of epidemic diseases particularly when diseases were mysterious without known cures or preventive measures as with AIDS during the last two decades of the twentieth century However scholars and public intellectuals especially post AIDS have missed a fundamental aspect of the history of epidemics Instead of sparking hatred and blame this study traces epidemics socio psychological consequences across time and discovers a radically different picture that epidemic diseases have more often unified societies across class race ethnicity
