### COMPACT EXCAVATOR EC45

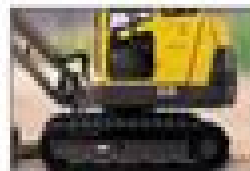

**Even more efficient!**

Like all Volvo machines, the EC45 develops an impressive level of performance. The bucket force and digging depth are amongst the best on the market to give you improved productivity on all your sites.

**Excellent equipment performance**

The bucket has a new large range of movements (over 300°). This characteristic guarantees a great attack and great resistance at all depths.

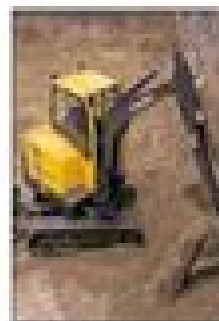

**Long chassis for more stability**

The considerable length of the track provides exceptional stability and offers more support and safety while working ground surfaces.

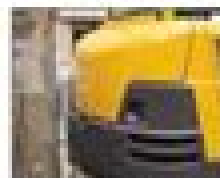

**Volvo quick coupling**

The exclusive Volvo quick coupling enables an excavator to be fitted to its bucket quickly without losing the operator's safe working area or other functions in hydraulic.

**Load-bearing systems:**  
even for a compact excavator  
these are easy to operate.

Being insensitive, independent of dimensions, the hydraulic load-bearing system fitted to the EC45 machine represents the best available technology.

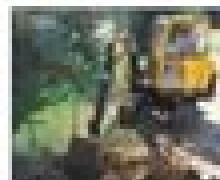

**Compact steel impact protection**

The new compact dimensions of the Volvo machine enable them to work safely in the restricted sites. The reinforced edges of the counter weight protect the machine and enable protection against all impacts.

**Locking of the offset arm**

The offset arm is equipped with a locking valve which locks the arm and prevents it from sliding. The result: the boom's offset is totally fixed in the position chosen by the operator even during long and difficult work.

**The boom effect for working alongside a wall**

The hydraulic effect of the boom makes it possible to reduce the overall dimensions of the excavator and to work alongside a wall.
