Globalization or Regionalization of the American and Asian Car Industry? M. Freyssenet, K. Shimizu, G. Volpato, 2003-04-15 The automobile sector is one of the most archetypal global industries and is seen by many as one of the main drivers behind the homogenisation of world markets due to firms internationalization strategies and the social practices that firms impose This book argues that this is not entirely the case due to the heterogeneity of firms and the diversity of strategies pursued It highlights the diversity and forms of internationalization and the preference for regionalization rather than globalization that has occurred over the past decade This book looks specifically at the American and Asian car industry

Gower Handbook of Purchasing Management Marc Day,2024-07-01 Originally published in 2002 the revised third edition of the Gower Handbook of Purchasing and Supply Management views procurement as standing on the boundary of the firm looking outwards and scanning the environment for new opportunities and threats In this respect as in many others the new edition is quite different from the previous two reflecting the many changes that have taken place for businesses over the years In particular this edition has been slimmed down and focused to assist the reader by working systematically outwards using a purchasing lens to view the wider business world The aim is to show the potential contribution that purchasing can make as a driver for organizational efficiency and business development It is this latter requirement the need for purchasing to generate revenue that has been identified as being ever more prominent as a demand on purchasing directors time and effort The book is now split into three sections Part I lays the foundations for building the organization of purchasing in a corporate environment Part II overlays further applications on the foundations of purchasing organization The assumption is made that the purchasing activities of a firm are proactive in outlook gathering knowledge and measuring their current corporate purchasing performance while also looking to generate revenues for the business Finally Part III provides case studies which bring to life some of the learning achieved through the framework laid out in the previous parts Written by leading practitioners and academics and published in association with The Chartered Institute of Purchasing and Supply
