Jwaneng (Botswana). Town Council,2004 **Structural Failure and Plasticity** X.L. Zhao,R.H. Grzebieta,2000-10-04 As mankind continues to push back the boundaries and begins to explore other worlds and the ocean depths a thorough understanding of how structures behave when subjected to extremes in temperature pressure and high loading rates will be essential This symposium provided the perfect forum for presenting research into structures subjected to such extreme loads There were a large number of papers presented under topics of impact blast and shock loading indicating a strong research interest in high rates of loading Similarly new topics have been added to the traditional symposium list such as fire loading earthquake loading and fatigue and connection failures It is clear now that fundamental knowledge of plastic deformation of structures to various extreme loads is coming of age Each full paper was peer reviewed by at least two experts in the field

Everyday Lifestyles and Sustainability Fabricio Chicca,Brenda Vale,Robert Vale,2018-04-09 The impact of humanity on the earth overshoots the earth s bio capacity to supply humanity s needs meaning that people are living off earth s capital rather than its income However not all countries are equal and this book explores why apparently similar patterns of daily living can lead to larger and smaller environmental impacts The contributors describe daily life in many different places in the world and then calculate the environmental impact of these ways of living from the perspective of ecological and carbon footprints This leads to comparison and discussion of what living within the limits of the planet might mean Current footprints for countries are derived from national statistics and these hide the variety of impacts made by individual people and the choices they make in their daily lives This book takes a bottom up approach by calculating the footprints of daily living The purpose is to show that small changes in behaviour now could avoid some very challenging problems in the future Offering a global perspective on the question of sustainable living this book will be of great interest to anyone with a concern for the future as well as students and researchers in environmental studies human geography and development studies
