Electrochemical Technologies for Energy Storage and Conversion Jiu-Jun Zhang, Lei Zhang, Hansan Liu, Andy Sun, Ru-Shi Liu, 2012-03-27 In this handbook and ready reference editors and authors from academia and industry share their in-depth knowledge of known and novel materials, devices and technologies with the reader. The result is a comprehensive overview of electrochemical energy and conversion methods including batteries, fuel cells, supercapacitors, hydrogen generation and storage as well as solar energy conversion. Each chapter addresses electrochemical processes, materials, components, degradation mechanisms, device assembly and manufacturing while also discussing the challenges and perspectives for each energy storage device in question. In addition, two introductory chapters acquaint readers with the fundamentals of energy storage and conversion and with the general engineering aspects of electrochemical devices. With its uniformly structured, self-contained chapters, this is ideal reading for entrants to the field as well as experienced researchers.

Critical Materials Strategy Steven Chu, 2011-05 This report examines the role of rare earth metals and other materials in the clean energy economy. It was prepared by the U.S. Department of Energy (DoE) based on data collected and research performed during 2010. In the report, DoE describes plans to: 1) develop its first integrated research agenda addressing critical materials; building on three technical workshops convened by the DoE during November and December 2010; 2) strengthen its capacity for information gathering on this topic; and 3) work closely with international partners including Japan and Europe to reduce vulnerability to supply disruptions and address critical material needs. Charts and tables. This is a print-on-demand report.

Data and Decision Sciences in Action Ruhul Sarker, Hussein A. Abbass, Simon Dunstall, Philip Kilby, Richard Davis, Leon Young, 2017-07-26 Offering a concise and multidisciplinary reference guide to the state of the art in Australian operations research, this book will be of great value to academics working in many disciplines associated with operations research as well as industrial practitioners engaged in planning, scheduling and logistics. Over 60 papers with topics ranging from academic research techniques and case studies to industrial and administrative best practices in operations research address aspects such as optimization, combinatorial optimization, decision analysis, supply chain management, queuing and routing and project management and logistics, government, cyber security, health care systems, mining and material processing, ergonomics and human factors, space applications, telecommunications and transportation among many others. This book presents the Proceedings of the National Conference of the Australian Society for Operations Research, the premier professional organization for Australian academics and practitioners working in optimization and other disciplines related to operations research. The conference was held in Canberra in November 2016.
