A Philosophy of War Alexander Moseley, 2002 War's origins are complex they are found in the nebulous systems of thoughts generated in cultures over time But while reason and explication can unravel those origins and explain why man wages war the task of abolishing war can never be completed by reason alone The unfolding philosophy of war is much more complex than asserting that man is free to choose war and therefore he is free to not choose war We need to explore the causal relationships between his nature and his thinking and in doing so we need to explore the realms of ideas that motivate and restrain him The author presents a unique interdisciplinary framework for understanding war's nature and causation examining biological and anthropological theories as well as relating traditional philosophical positions to war from Plato to Sartre Christianity to Marxism This book is distinctive in producing a coherent theory of war that goes beyond the usual analyses and explanations generated in academic sub disciplines The range of philosophical analysis is broad and where appropriate the author applies his philosophical outline to particular conflicts such as the Vietnam War and the Thirty Years War

DR ALEXANDER MOSELEY is a political philosophy editor for the IEP Internet Encyclopedia of Philosophy and is affiliated with the Mises Institute the Cato Institute the Institute for Humane Studies and with the US Society for Philosophy in a Contemporary World He has lectured on the philosophy and morality of war at several British universities including the London School of Economics Currently he teaches Economics in the UK and is preparing a second volume to *A Philosophy of War* for publication in Fall 2002 to be followed by *Great Philosophers On War*

Economic Policy and the Financial Crisis Łukasz Mamica, Pasquale Tridico, 2014-03-26 The consequences of the global economic crisis which started in the United States in 2007-08 are still being felt in most of the advanced economies and the mainstream tools of recovery are not having the required results It seems that many of the after effects of the crisis including the instability of the financial markets increasing public debts and limited economic growth require new solutions from both economic policy and theory Lower aggregate demand during the crisis increased the pressure on firms to be more competitive and at the same time the crisis in the banking system has had a negative impact on the willingness of financial institutions to give credit to companies for investment Therefore the key issue for current economic policy is to find a balance between the stabilisation of public finance and maintaining the momentum of long term growth This book offers an evolutionary developmental analysis combining elements of neo Schumpeterian economics institutional economics and post Keynesian economics to show that selection processes within an economy and the institutional rules shaping those processes are substantially more important than usually recognised by evolutionary economic theory Two major challenges for economic theory and policy in particular have emerged during the crisis The first is the rise of unemployment coupled with growing public deficits The second is the financial instability which threatens the permanence of economic development This book examines the performance of the advanced economies since the crisis and explores why some of them have been more

successful in tackling these challenges than others It is argued that the reasons for the varied performances of these economies lie in the economic policies which were introduced before and in the aftermath of the crisis and the differences in the regulation of their labour markets This volume will be of interest to students and academics in the areas of macroeconomics public economics and public management **The New York Times Book Review** ,1985-07 Presents extended reviews of noteworthy books short reviews essays and articles on topics and trends in publishing literature culture and the arts Includes lists of best sellers hardcover and paperback The Municipal Journal, Public Works Engineer and Contractors' Guide ,1957 Palm Beach Life ,2005-12 Since 1906 Palm Beach Life has been the premier showcase of island living at its finest fashion interiors landscapes personality profiles society news and much more **Weekly World News** ,1993-11-09 Rooted in the creative success of over 30 years of supermarket tabloid publishing the Weekly World News has been the world s only reliable news source since 1979 The online hub www.weeklyworldnews.com is a leading entertainment news site Weekly World News ,1993-11-09 Rooted in the creative success of over 30 years of supermarket tabloid publishing the Weekly World News has been the world s only reliable news source since 1979 The online hub www.weeklyworldnews.com is a leading entertainment news site **Bulletin of the Atomic Scientists** ,1970-06 The Bulletin of the Atomic Scientists is the premier public resource on scientific and technological developments that impact global security Founded by Manhattan Project Scientists the Bulletin s iconic Doomsday Clock stimulates solutions for a safer world Municipal Journal, Public Works Engineer Contractor's Guide ,1957 **Who's who in America** ,2003
