

LA SEXUALITÉ EST UN LARGE SPECTRE

L'orientation sexuelle (ou identité sexuelle) prend racine dans les sentiments d'attraction sexuelle que tu éprouves pour d'autres personnes. Par le passé, il n'y avait pas de réelle compréhension ou acceptation de tout ce qui ne relevait pas de l'hétérosexualité. Bien que ce soit encore le cas dans de nombreux endroits, on comprend de mieux en mieux que la sexualité est une question plus complexe et nuancée. L'idée que la sexualité est un spectre permet aux gens de percevoir leur identité sexuelle de manière plus fluide, plutôt que de devoir choisir entre une étiquette ou une autre. De nombreuses personnes ont le sentiment que leur orientation sexuelle se situe dans un large éventail, plutôt que sur un point fixe du spectre.

Voici une brève explication de certaines identités sexuelles. Cette liste n'est en aucun cas exhaustive. Il existe de nombreuses autres identités et tu trouveras celle qui te convient, quitte à ne pas porter d'étiquette.

HÉTÉROSEXUELLE

Être attiré·e par les personnes du genre opposé au sien.

GAY OU LESBIENNE

Être attiré·e par les personnes du même genre que soi.

BISEXUELLE

Être attiré·e par les personnes du même genre et de genres différents que soi.

ASEXUELLE

Ne pas ressentir (ou très peu) d'attraction sexuelle pour les autres. Ne signifie pas nécessairement que l'on n'est pas actif·ve sexuellement.

PANSEXUELLE

Être émotionnellement et/ou physiquement attiré·e par les personnes de tous genres. Certaines personnes préfèrent le terme « pansexuel·le » à celui de « bisexuel·le ». Il est parfois décrit comme le fait d'être attiré·e par une personne, quels que soient son sexe biologique et son identité de genre.
