Stratospheric Ozone Reduction, Solar Ultraviolet Radiation and Plant Life Robert C. Worrest, Martyn M. Caldwell, 2013-06-29 Inadvertent alterations of the earth's atmosphere by man's activities are now of regional and even global proportion Increasing concern has been focused in the last decade on consequences of acid rain carbon dioxide enrichment of the atmosphere and reduction of ozone in the upper atmosphere The latter two problems are of truly global scale This book focuses on the atmospheric ozone reduction problem and the potential consequences for plant life unlike carbon dioxide enrichment reduction of the total atmospheric ozone column has not yet taken place to a noticeable degree it is a problem of the future The processes leading to ozone reduction involve time periods on the scale of decades However by the same token if society finds ozone reduction to be unacceptable it will take even longer for the process to be reversed Thus anticipation of the consequences of ozone reduction is of obvious importance Speculation of the possibility of ozone reduction first appeared in the early 1970's and was focused on the consequences of the injection of large quantities of nitrogen oxides into the upper atmosphere by supersonic aircraft flying at high altitudes Other sources of nitrogen oxides originating from the earth's surface were also

considered With further refinement the concerns of nitrogen oxide pollution of the upper atmosphere were diminished since the quantities likely to be involved were insufficient to cause a serious threat to the ozone layer

Exploring Ultraviolet Photography David Prutchi, 2017-01-10 Explores how to capture ultraviolet light in digital photography covering such topics as lens and filter selection focus and exposure techniques and post production techniques designed to enhance ultraviolet photographs

Visible Spectroscopy in EBT3 Solar Ultraviolet Dosimeter Ummi Shuhada Osman, Ahmad Fairuz Omar, 2021-12-08 Gafchromic external beam therapy EBT films have been widely used in clinical dosimetric applications due to their high sensitivity to ionizing radiation such as X ray and electron beams In 2011 International Specialty Products ISP introduced a new generation of films called EBT3 film The films exhibit color changes from light green to darker color with the increment of absorbed doses of ionizing radiation The color changes of the films are commonly characterized using flatbed reflective scanner and subsequently being used to predict the absorbed dose Besides ionizing radiation EBT3 films have also been proven to have high sensitivity towards ultraviolet radiation and hence make it a promising method in measuring solar ultraviolet radiation exposure This research book presents a comprehensive visible spectroscopy method in characterizing the color changes of EBT3 films specifically for the measurement of solar ultraviolet exposure The visible spectroscopy method and analysis presented in this book is also applicable for other types of transparent films for radiation dosimetry
