*Sociology as Analysis of the Unintended* Adriana Mica, 2018-06-27 Sociology of unintended consequences is commonly depicted as a framework for understanding the outcomes that run counter to the initial intentions of social actors because of factors such as ignorance error and complexity This conventional approach however is now undergoing change under the influence of more encompassing shifts in framing in social sciences Indeed in the last few years the study of the unintended has evidently moved from the question What are the sources of the unintended to the inquiry What is it that makes the unintended possible or What risks but also opportunities do the unintended entail Explaining this puzzle in relation to the internal dynamics of sociology of unintended consequences Adriana Mica makes an erudite journey in relation to its three main analytical frameworks their semantic shifts setbacks and theoretical revivals Certainly through the examination of the use of protective headgear in boxing this volume renders explicitly the possibilistic turn not only in the specific research of the unintended but in sociology more generally Presenting the contributions of leading sociology theorists in a new light *Sociology as Analysis of the Unintended* will appeal to graduate students and researchers interested in fields such as theoretical sociology sociology of substantive issues and sociology of sport

Rethinking Resilience, Adaptation and Transformation in a Time of Change Wanglin Yan, Will Galloway, 2017-03-21 This book contributes to the literature on resilience hazard planning risk management environmental policy and design presenting articles that focus on building resilience through social and technical means Bringing together contributions from Japanese authors the book also offers a rare English language glimpse into current policy and practice in Japan since the 2011 Tohoku disaster The growth of resilience as a common point of contact for fields as disparate as economics architecture and population politics reflects a shared concern about our capacity to cope with and adapt to change The ability to bounce back from hardship and disaster is essential to all of our futures Yet if such ability is to be sustainable and not rely on a brute force response innovation will need to become a core practice for policymakers and on the ground responders alike The book offers a valuable reference guide for graduate students researchers and policy analysts who are looking for a holistic but practical approach to resilience planning

*The New Neighborhood Senior Center* Joyce Weil, 2014-11-03 In 2011 seven thousand American baby boomers those born between 1946 and 1964 turned sixty five daily As this largest U S generation ages cities municipalities and

governments at every level must grapple with the allocation of resources and funding for maintaining the quality of life health and standard of living for an aging population In *The New Neighborhood Senior Center* Joyce Weil uses in depth ethnographic methods to examine a working class senior center in Queens New York She explores the ways in which social structure directly affects the lives of older Americans and traces the role of political social and economic institutions and neighborhood processes in the decision to close such centers throughout the city of New York Many policy makers and gerontologists advocate a concept of aging in place whereby the communities in which these older residents live provide access to resources that foster and maintain their independence But all aging in place is not equal and the success of such efforts depends heavily upon the social class and availability of resources in any given community Senior centers expanded in part by funding from federal programs in the 1970s were designed as focal points in the provision of community based services However for the first wave of boomers the role of these centers has come to be questioned Declining government support has led to the closings of many centers even as the remaining centers are beginning to rebrand to attract the boomer generation However *The New Neighborhood Senior Center* demonstrates the need to balance what the boomers want from centers with the needs of frailer or more vulnerable elders who rely on the services of senior centers on a daily basis Weil challenges readers to consider what changes in social policies are needed to support or supplement senior centers and the functions they serve
